1. Introduction

This Abstract Test Suite (ATS) is the first version of the ATM Forum UNI 4.0 Signalling Conformance Test Suite for the Network Side. The ATS is based on the UNI Signalling Protocol as described in the ATM Forum User-Network Interface (UNI) Specification, Version 4.0 [1]. The ATS is described in Tree and Tabular Combined Notation (TTCN) [2]. This test suite aligns with the principles defined in the Conformance Testing Methodology and Framework [3].

1.1 Scope and Field of Application

The test suite was designed for point-to-point configurations only, and does not include point-to-multipoint configurations.

This conformance test suite is based on the UNI Signalling Protocol as described in the ATM Forum User-Network Interface (UNI) Specification, Version 4.0 [1]. The Implementation Under Test (IUT) is the network side implementation of this protocol. The abstract test cases contained in this document are a comprehensive reflection of the indicated Technical Reference.

The test methodology is a “remote test method” as described in Reference [4]. It is possible that the entire test suite is not applicable for all IUTs. A test selection procedure must be performed to determine the applicability of a test to a particular IUT. Such selection shall be based on the Protocol Implementation Conformance Statement (PICS) and the Protocol Implementation eXtra Information for Testing (PIXIT).

The purpose of this test suite is to test that the IUT does not violate any of the protocol procedures of UNI Signalling Protocol as described in the ATM Forum User-Network Interface (UNI) Specification, Version 4.0 [1]. The preferred use of this test suite is under conditions where the only messages that are sent across the interface are those in response to events in the test cases themselves. In order to allow for conditions where the IUT might send additional messages (e.g., STATUS), the test suite has been designed in such a way that the verdicts will not be affected by receipt of these messages.

2. Definitions

This test suite uses valid, invalid and inopportune messages to test the IUT behaviour. These terms are defined as follows:

- A valid message is one that is allowed by ATM Forum UNI 4.0 Specification and is both syntactically correct and occurs or arrives in an expected or allowed context.
- An invalid message is one that is syntactically not allowed by the UNI 4.0 Specification.
- An inopportune message is one that, although syntactically correct, occurs or arrives at an unexpected and disallowed time (according to the UNI 4.0 Specification).

3. General Aspects

As per ISO/IEC 9646, “...a complete and independent specification of the actions required to achieve a specific test purpose...” is called an abstract test case. The abstract test cases for this suite are defined using the remote testing methodology. The test cases include a preamble, a test body and a postamble, which are defined in the following sections.

The following states are tested by this suite:

- Null State (N0)
- Call Initiated State (N1)
- Outgoing Call Proceeding State (N3)
- Call Delivered (N4)
- Call Present State (N6)
- Call Received (N7)
- Incoming Call Proceeding State (N9)
- Active State (N10)
- Released Indication State (N12)

There are two states that are not tested as they are transient states. The states that are not tested are:

- Connect Request State (N8)
- Released Request State (N11)

3.1 Test Groups and Subgroups

The Signalling Conformance Test Suite consists of four groups:

- General
- Error
- Timers
- Status

The General group has been further subdivided into three groups containing only valid tests:

- Outgoing
- Incoming
- Clearing

The Error group has been further subdivided into seven groups containing invalid and inopportune tests:

- General (5 sub-groups)
 - Protocol Discriminator Error
 - Message Too Short
 - Message Length Error
 - IE Duplicated more than the Specification
 - Message Type Octet 2 Flag=1
- Call Reference (5 sub-groups)
 - Non Zero bits 5-8 Octet 1
 - Length not equal to 3
 - Value not in use
 - Flag incorrectly set to 1
 - Global Call Reference
- Message Sequence
- Mandatory (2 sub-groups)
 - Mandatory IE missing
 - Mandatory IE invalid content
- Non-Mandatory (3 sub-groups)
 - Unrecognized IE.
 - IE.content error
 - Unexpected recognized IE.

3.2 Preamble

The preamble of a test case consists of the steps required to bring the IUT to the appropriate initial state.

3.3 Test Body

The test body is the sequence of steps within a test case that is essential to achieve the test purpose, followed by the verification of the IUTs ending state. Verdicts are assigned to the outcome of the test cases.

It is important to test the observable behaviour of the IUT, which includes state transitions and Protocol Data Unit (PDU) responses. Many of the IUT states are transitional and may not be implemented.

3.4 Postamble

For this suite, the idle state is the NULL State (N0). At the end of execution of a test body, the IUT may not be in the NULL state. A postamble is required to bring the IUT from the ending state to the NULL state. For all states, a RELEASE COMPLETE message is sent which will release the call in progress, if any, and returns the IUT to the

NULL state.

3.5 Timer Definitions

The timer types and values used by the tester are those types and default values defined in the UNI 4.0 Specification. In addition, the following timers are also used:

- 1.Ts: This timer is 'sufficiently long for the IUT to respond'. It is used when a response is required to achieve the test purpose.
- 2.Tw: This timer is defined as 'shorter than the shortest IUT timer'. It is used when the test purpose is 'no response'.

These timers are not used to verify the exact timing of an implementation, but are used to limit the time in which the test should wait for a message or to limit the total duration of the test. Default values are provided.

3.6 Configurations Requirements

The test configuration used for Network Side is given in Figure 3-1 below. The ATM tester has two Points of Control and Observation (PCOs) corresponding to two ports on the Implementation Under Test (IUT). PCO_T will provide the

IUT with test stimuli to provoke an action from the IUT. This will result in an output signal which will be monitored by either PCO_T or PCO_R. This test configuration is consistent with the remote test method chosen for testing Intermediate Systems (Network Side).

The test cases were developed with the assumption that the IUT has the point-to-point capability. Only the point-to-point configurations are tested (one incoming port and only one outgoing port), this does not include testing where there is one incoming port and several outgoing ports.

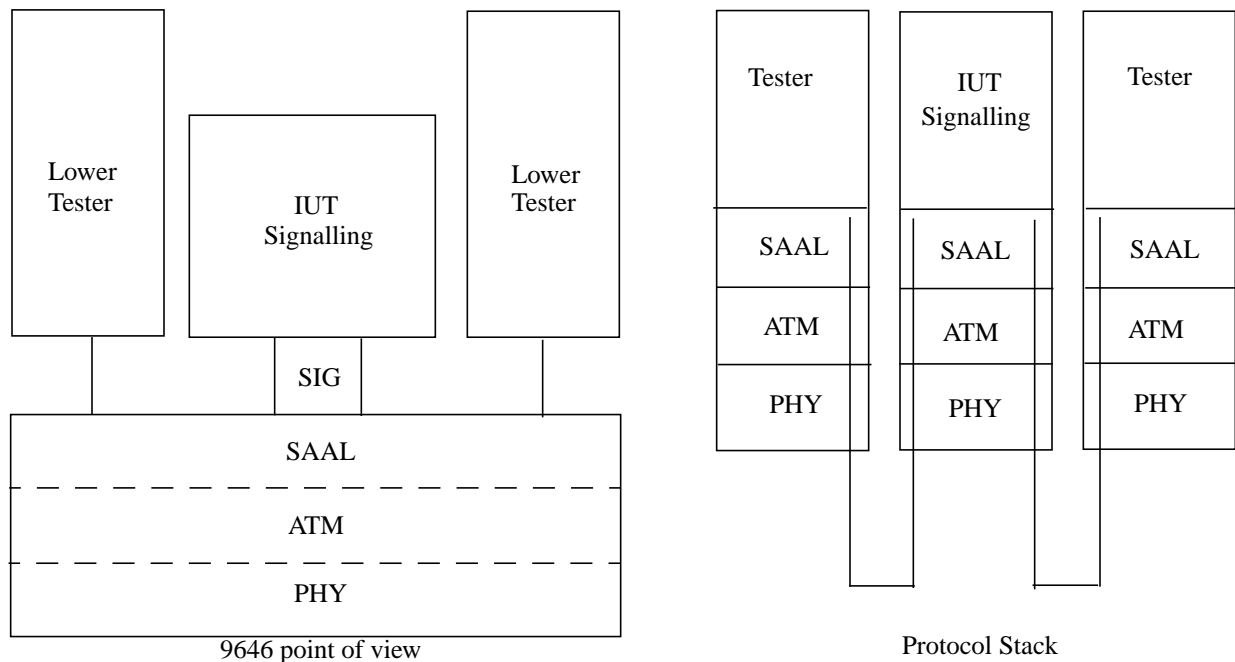

Figure 3-1 Configuration for testing of a Network Side.

This version of the ATS assumes that the input and output signals can be treated independently. This is possible based on the TTCN model in which (1) messages in the FIFO input queue for each PCO are retrieved only when a READ event for that PCO is executed, and (2) the FIFO queues for each PCO are independent from each other. This way, it is possible to send a sequence of messages to the IUT and handle the responses later.

4. Conformance ATS Status Report

The TTCN of this abstract test suite has passed the syntax checking process for version af-test-0190.000.mp dated 020515 of the .mp file according to the TTCN specification in ISO 9646 part #3 version ISO/IEC 9646-3:1992 dated 1992.

PICS Reference for IUT: _____
Limitations of the IUT: _____

Instructions for Completing the PIXIT Proforma

The Protocol Implementation eXtra Information for Testing (PIXIT) is a document which is to be completed by the user submitting an implementation for testing. It contains information related to the Implementation Under Test (IUT) and the test environment which is required by the IUT. The PIXIT information is beyond that provided by the Protocol Implementation Conformance Statement (PICS).

This section contains the PIXIT Proforma which meets the requirements of this test suite. The test suite developer and/or test laboratory may provide additional questions to this proforma, as needed.

The user should fill in all sections that are applicable to the implementation, and leave blank those that are not. This is done by either checking a ballot box, or by writing an answer in the provided space. In some cases the type of value to be provided is specified (e.g., a decimal number) along with the proper units (e.g., seconds). When the user is required to check a ballot box and more than one alternative value is listed, the first listed alternative value shall be considered to be the default value for the corresponding PIXIT parameter, unless otherwise indicated in the corresponding Question or Value fields. For a more detailed meaning for each of the possible value choices, the user may refer to ATM Forum "ATM User-Network Interface Specification. Version 4.0".

Configuration

Item1	Question	Value	Answer
C.1	IUT executes restart procedures at the initialization phase	True, False Default True	True ___ False ___
C.2	IUT can be configured with all virtual channels busy	True, False Default True	True ___ False ___

Timers

Item #	Question	Value	Answer
T.1	Value(seconds) for a timer that is sufficiently long for the IUT to respond. It is used when when a response is expected from the IUT	Units: seconds Default: 5 s	
T.2	Value (seconds) for a timer that is shorter than the shortes IUT implemented timer. It is used when no response is expected from the IUT	Units: seconds Default: 3s	
T.3	Value (seconds) for a timer that is longer than the longets IUT implemented timer. It is used to verify the reception of a message from IUT.	Units: seconds Default:	
TV.1	Value (seconds) for the IUT T303 timer. It is used for retransmission of SETUP message	Units: seconds Default: 4s	
TV.2	Value (seconds) for the IUT T308 timer. It is used for retransmission of RELEASE message	Units: seconds Default: 30s	
TV.3	Value (seconds) for the IUT T309 timer. It is used during a SAAL disconnection	Units: seconds Default: 10s	
TV.4	Value (seconds) for the IUT T310 timer. It is used when the CALL PROCEEDING message is received	Units: seconds Default: 10s	
TV.5	Value (seconds) for the IUT T322 timer. It is used when the STATUS ENQUIRY message is sent	Units: seconds Default: 4s	
TV.6	Value (seconnds) for a timer tolerance (the delay time in transferring and processing messages)	Units: seconds Default: 1s	

Options

Item #	Question	Value	Answer
O.1	IUT generates a CALL PROCEEDING after receiving a SETUP from the user	True, False Default: False	True ___ False ___
O.2	IUT generates a STATUS after a message with a Non-Mandatory IE error	True, False Default: False	True ___ False ___
O.3	IUT generates a STATUS ENQUIRY after a SAAL link error	True, False Default: False	True ___ False ___
O.4	IUT resends SETUP after the expiry of timer T303	True, False Default: False	True ___ False ___
O.5	IUT requires the Calling Party Number in the SETUP Message	True, False Default: False	True ___ False ___
O.6	IUT supports repetition of Broad band Low Layer Information Element	True, False Default: true	True ___ False ___
O.7	IUT supports the Broadband High Layer Information Element	True, False Default: True	True ___ False ___
O.8	IUT supports the Broadband Low Layer Information Element	True, False Default: True	True ___ False ___
O.9	IUT transports the Broadband Low Layer Information Element to the calling user in CONNECT message	True, False Default: True	True ___ False ___
O.10	IUT supports the Transit Network Selection Information Element	True, False Default: True	True ___ False ___
O.11	Chose a valid Transit Network Selection identification code (a carrier identification code).(Note 1)	Hexstring	
O.12	Chose a unrecognized Transit Network Selection identification code.(Note 1)	Hexstring	
O.13	Chose a non valid Transit Network Selection identification code.(Note 1)	Hexstring	
O.14	Does IUT follow the content of Action Indicator when MT flag = 1	True, False Default: true	True ___ False ___
O.15	Does IUT support Generic Identifier Transport Information Element	True, False Default: true	True ___ False ___

Item #	Question	Value	Answer
O.16	Does IUT support negotiation of ATM Traffic parameter	True, False Default: true	True ___ False ___
O.17	Does IUT support the Frame Discard Capability.	True, False Default: true	True ___ False ___
Note 1:the response is meaningful only if Q10 is TRUE			

Traffic

Item#	Question	Value	Answer
TR.1	Bearer Class A is supported	True, False Default: True	True ___ False ___
TR.2	Bearer Class C is supported	True, False Default: True	True ___ False ___
TR.3	Bearer Class X is supported	True, False Default: True	True ___ False ___
TR.4	Bearer Class VP is supported	True, False Default: True	True ___ False ___
TR.5	Peak Cell Rate (CLP = 0+1)	Integer	
TR.6	Peak Cell Rate (CLP = 0) is supported	True, False Default: True	True ___ False ___
TR.7	Peak Cell Rate (CLP = 0) (Note 1)	Integer	
TR.8	SCR and MBS (CLP = 0) are supported	True, False Default: True	True ___ False ___
TR.9	Sustainable Cell Rate (CLP = 0) (Note 2)	Integer	
TR.10	Maximum Burst Size (CLP = 0)(Note 2)	Integer	
TR.11	SCR AND mbs (CLP 0+1) are supported	True, False Default: true	True ___ False ___
TR.12	Sustainable Cell Rate (CLP = 0+1) (Note 3)	Integer	
TR.13	Maximum Burst Size (CLP 0 + 1) (Note 3)	Integer	
TR.14	Best Effert is supported	True, False Default: True	True ___ False ___
TR.15	QoS Class 1 is supported	True, False Default: True	True ___ False ___
TR.16	QoS Class 3 is supported	True, False Default: True	True ___ False ___
TR.17	ABR is supported	True, False Default: True	True ___ False ___
TR.18	CBR is supported	True, False Default: True	True ___ False ___
Note 1:the response is meaningful only if TR.6 is True Note 2:the response is meaningful only if TR.8 is True Note 3:the response is meaningful only if TR.11 is True			

Item#	Question	Value	Answer
TR.19	UBR is supported	True, False Default: True	True ___ False ___
TR.20	nrtVBR is supported	True, False Default: True	True ___ False ___
TR.21	rtVBR is supported	True, False Default: True	True ___ False ___
TR.22	ABR Minumum Cell Rate	Integer	
Note 1:the response is meaningful only if TR.6 is True Note 2:the response is meaningful only if TR.8 is True Note 3:the response is meaningful only if TR.11 is True			

Addresses

Item#	Question	Value	Answer
A.1	Pulic (E.164) format or Privat (NSAP) format	Public, Privat	Public ___ Private ___
A.2	Adress of T Port (Note 1)	Hexstring	
A.3	Adress of R1 port (Note 1)	Hexstring	
A.4	Invalid Adress	Hexstring	
A.5	Address of T Port in Called Party Number sent in outgoing SETUP from R1 (Note 2)	IA5 characters	
A.6	Address of T Port in Called Party Number received in incoming SETUP at T (Note 2)	IA5 characters	
A.7	Address of T Port in Calling Party Number sent in outgoing SETUP from T (Note 2)	IA5 characters	
A.8	Address of R1 Port in Called Party Number sent in outgoing SETUP from T (Note 2)	IA5 characters	
A.9	Address of R1 Port in Calling Party Number sent in outgoing SETUP from R1 (Note 2)	IA5 characters	
A.10	Address of R1 Port in Calling Party Number received in SETUP at T (Note 2)	IA5 characters	
A.11	Invalid Adress (Note 2)	IA5 characters	
Note1: the response is meaningful only if A.1 is Privat Note2: the response is meaningful only if A.1 is Public			

Item#	Question	Value	Answer
A.12	ATM Anycast supported	True, False Default: True	True ___ False ___
Note1: the response is meaningful only if A.1 is Privat Note2: the response is meaningful only if A.1 is Public

POINT_TO_POINT/GENERAL/CLEARING/	N0_V0105_1		If the IUT receives a request for a vci that is not available within the specified vpci, then verify that the IUT sends a RELEASE COMPLETE (CA/value=35) after receiving a valid SETUP(with exclusive VPCI,exclusive VCI) when the IUT is in State N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/GENERAL/CLEARING/	N0_V0106_1	ALL_USE_VP_YES	If the IUT can be configured with all vpci busy then verify that the IUT sends a RELEASE COMPLETE (CA/value=35) after receiving a valid SETUP(with exclusive VPCI, no VCI and BC = Transparent VP service) when the IUT is in State N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/GENERAL/CLEARING/	N0_V0107_1	ANS_YES	If IUT does not support Bearer Class A , then verify that the IUT sends a RELEASE COMPLETE or RELEASE (CA/value=57, 58 or 65) after receiving a valid SETUP(with ATC=7) when the IUT is inState N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/GENERAL/CLEARING/	N0_V0107_2	ANS_YES	If IUT does not support Bearer Class A , then verify that the IUT sends a RELEASE COMPLETE or RELEASE (CA/value=57, 58 or 65) after receiving a valid SETUP(with ATC=abs) when the IUT is inState N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/GENERAL/CLEARING/	N0_V0107_3	XNS_YES	If IUT does not support Bearer Class X , then verify that the IUT sends a RELEASE COMPLETE or RELEASE (CA/value=57, 58 or 65) after receiving a valid SETUP(with ATC=5) when the IUT is inState N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/GENERAL/CLEARING/	N0_V0107_4	XNS_SCR0_YES	If IUT does not support Bearer Class X , then verify that the IUT sends a RELEASE COMPLETE or RELEASE (CA/value=57, 58 or 65) after receiving a valid SETUP(with ATC=9, SCR/MBS(CLP=0)) when the IUT is inState N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/GENERAL/CLEARING/	N0_V0107_5	XNS_SCR0_YES	If IUT does not support Bearer Class X , then verify that the IUT sends a RELEASE COMPLETE or RELEASE (CA/value=57, 58 or 65) after receiving a valid SETUP(with ATC=10, SCR/MBS(CLP=0)) when the IUT is inState N0. The final IUT state is expected to be N0.

Test Group Reference	Test Case Id	Selection Ref	Description	Page Nr
POINT_TO_POINT/ERROR/M_SEQUENCE/	N1_I0501		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error) when the IUT is in State N1 or N3. The final IUT state is expected to be N1 or N3.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N4_I0502_1		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error) when the IUT is in State N4. The final IUT state is expected to be N4.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N7_I0502_2		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error) when the IUT is in State N7. The final IUT state is expected to be N7.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N9_I0502_3		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error) when the IUT is in State N9. The final IUT state is expected to be N9.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N10_I0502_4		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error) when the IUT is in State N10. The final IUT state is expected to be N10.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N12_I0502_5		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error) when the IUT is in State N12. The final IUT state is expected to be N12.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N1_I0503		Verify that the IUT sends a RELEASE (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=00B) when the IUT is in State N1 or N3. The final IUT state is expected to be N12.

Test Group Reference	Test Case Id	Selection Ref	Description	Page Nr
POINT_TO_POINT/ERROR/M_SEQUENCE/	N4_I0504_1		Verify that the IUT sends a RELEASE (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=00B) when the IUT is in State N4. The final IUT state is expected to be N12.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N7_I0504_2		Verify that the IUT sends a RELEASE (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=00B) when the IUT is in State N7. The final IUT state is expected to be N12.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N9_I0504_3		Verify that the IUT sends a RELEASE (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=00B) when the IUT is in State N9. The final IUT state is expected to be N12.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N10_I0504_4		Verify that the IUT sends a RELEASE (CA/value =97 or 101 diag= CALL PROC MT) after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=00B) when the IUT is in State N10. The final IUT state is expected to be N12.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N12_I0504_5		Verify that the IUT do not respond after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=00B) when the IUT is in State N12. The final IUT state is expected to be N12.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N1_I0505		Verify that the IUT does not respond after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=01B) when the IUT is in State N1 or N3. The final IUT state is expected to be N1 or N3.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N4_I0506_1		Verify that the IUT does not respond after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=01B) when the IUT is in State N4. The final IUT state is expected to be N4.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N7_I0506_2		Verify that the IUT does not respond after receiving a CALL PROCEEDING (message sequence error and MT/flag=1, indicator=01B) when the IUT is in State N7. The final IUT state is expected to be N7.

POINT_TO_POINT/ERROR/M_SEQUENCE/	N4_I0537_1		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= REST ACK MT) after receiving a RESTART ACKNOWLEDGE (message sequence error) when the IUT is in State N4. The final IUT state is expected to be N4.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N6_I0537_2		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= REST ACK MT) after receiving a RESTART ACKNOWLEDGE (message sequence error) when the IUT is in State N6. The final IUT state is expected to be N6.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N7_I0537_3		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= REST ACK MT) after receiving a RESTART ACKNOWLEDGE (message sequence error) when the IUT is in State N7. The final IUT state is expected to be N7.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N9_I0537_4		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= REST ACK MT) after receiving a RESTART ACKNOWLEDGE (message sequence error) when the IUT is in State N9. The final IUT state is expected to be N9.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N10_I0537_5		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= REST ACK MT) after receiving a RESTART ACKNOWLEDGE (message sequence error) when the IUT is in State N10. The final IUT state is expected to be N10.	
POINT_TO_POINT/ERROR/M_SEQUENCE/	N12_I0537_6		Verify that the IUT sends a STATUS (CA/value =97 or 101 diag= REST ACK MT) after receiving a RESTART ACKNOWLEDGE (message sequence error) when the IUT is in State N12. The final IUT state is expected to be N12.	
POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N0_N0551		Verify that the IUT sends RELEASE COMPLETE (CA/value = 96) after receiving an invalid SETUP (mandatory missing ATD) when the IUT is in State N0. The final IUT state is expected to be N0.

POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N0_N0552		Verify that the IUT sends RELEASE COMPLETE (CA/value = 96) after receiving an invalid SETUP (mandatory missing ATD) when the IUT is in State N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N0_N0553		Verify that the IUT sends RELEASE COMPLETE (CA/value = 96) after receiving an invalid SETUP (mandatory missing BBC) when the IUT is in State N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N0_N0554		Verify that the IUT sends RELEASE COMPLETE (CA/value = 96) after receiving an invalid SETUP (mandatory missing BBC, MT/flag=1 and indicator=01B) when the IUT is in State N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N0_N0555		Verify that the IUT sends RELEASE COMPLETE (CA/value = 96) after receiving an invalid SETUP (mandatory missing CDN) when the IUT is in State N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N6_N0556		Verify that the IUT sends RELEASE COMPLETE (CA/value = 96) after receiving an invalid SETUP (mandatory missing QOS and EQOS) when the IUT is in State N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N0_N0557	ABR_X_YES	Verify that the IUT sends RELEASE COMPLETE (CA/value = 96) after receiving an invalid SETUP (mandatory missing ASP, ABR set in BBC) when the IUT is in State N0. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N9_N0558	ABR_X_YES	Verify that the IUT sends STATUS (CA/value = 96, diag= ASP identifier) after receiving an invalid CONNECT (mandatory missing ASP, ABR set in BBC) when the IUT is in State N9. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/IE_MISSING/	N9_N0559	ABR_X_YES	Verify that the IUT does not respond after receiving an invalid CONNECT (mandatory missing ASP, ABR set in BBC, MT/flag=1, indicator=01B) when the IUT is in State N9. The final IUT state is expected to be N9.

Test Group Reference	Test Case Id	Selection Ref	Description	Page Nr
POINT_TO_POINT/ERROR/MANDATORY/INVALID_CO NTENT/	N6_N0652	ABR_X_YES	Verify that the IUT sends a STATUS (CA/value =100, diag= ASP identifier) after receiving an invalid CONNECT (ASP length exceed the maximum) when the IUT is in State N6. The final IUT state is expected to be N6.	
POINT_TO_POINT/ERROR/MANDATORY/INVALID_CO NTENT/	N6_N0653	ABR_X_YES	Verify that the IUT sends a STATUS (CA/value =100, diag= ASP identifier) after receiving an invalid CONNECT (ASP coding standard = 01B) when the IUT is in State N6. The final IUT state is expected to be N6.	
POINT_TO_POINT/ERROR/MANDATORY/INVALID_CO NTENT/	N6_N0654	ABR_X_YES	Verify that the IUT sends a STATUS (CA/value =96, diag= ASP identifier) after receiving an invalid CONNECT (ASP/unrecognized identifier = 1111111BB) when the IUT is in State N6. The final IUT state is expected to be N6.	
POINT_TO_POINT/ERROR/MANDATORY/INVALID_CO NTENT/	N10_N0655		Verify that the IUT sends a RELEASE COMPLETE (CA/value =100 diag=CA identifier) after receiving a invalid RELEASE (CA exceed the maximum length) when the IUT is in State N10. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/INVALID_CO NTENT/	N10_N0656		Verify that the IUT sends a RELEASE COMPLETE (CA/value =100 diag=CA identifier) after receiving an invalid RELEASE (CA exceed the maximum length, IE header/flag=1, indicator=101B) when the IUT is in State N10. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/INVALID_CO NTENT/	N10_N0657		Verify that the IUT sends a RELEASE COMPLETE (CA/value =100 diag=CA identifier) after receiving a invalid RELEASE (CA/location=1111B) when the IUT is in State N10. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/INVALID_CO NTENT/	N10_N0658		Verify that the IUT sends a RELEASE COMPLETE (CA/value =100 diag=CA identifier) after receiving a invalid RELEASE (CA/value =0) when the IUT is in State N10. The final IUT state is expected to be N0.	
POINT_TO_POINT/ERROR/MANDATORY/INVALID_CO NTENT/	N10_I0659		Verify that the IUT sends a RELEASE COMPLETE after receiving an invalid RELEASE (CA/spare =111B) when the IUT is in State N10. The final IUT state is expected to be N0.

BRI_2_8	BITSTRING[1]		Extension bit
BRI_2_76	BITSTRING[2]		Coding Standard
BRI_2_51	BITSTRING[5]		IE Instruction Field

BRI_5_OC

Type Name : BRI_5_OC
Encoding Variation :
Comments : Broadband Repeat Indicator Octet 5.

Element Name	Type Definition	Field Encoding	Comments
BRI_5_8	BITSTRING[1]		Extension bit
BRI_5_75	BITSTRING[3]		Spare bits
BRI_5_41	BITSTRING[4]		Broadband Repeat Indication

BSC_IE

Type Name : BSC_IE
Encoding Variation :
Comments : Broadband Sending Complete IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
BSC_1	OCTETSTRING[1]		Octet 1, Identifier
BSC_2	BSC_2_OC		Octet 2, Coding and IE Instruction Field
BSC_34	HEXSTRING[4]		Octet 3 and 4, Length of BSC IE
BSC_5	BSC_5_OC		Octet 5, Broadband Sending Complete Indication
BSC_R	HEXSTRING		Used to exceed the maximum length of BSC IE

BSC_2_OC

Type Name : BSC_2_OC
Encoding Variation :
Comments : Broadband Sending Complete Octet 2.

Element Name	Type Definition	Field Encoding	Comments
BSC_2_8	BITSTRING[1]		Extension bit
BSC_2_76	BITSTRING[2]		Coding Standard
BSC_2_51	BITSTRING[5]		IE Instruction Field

BSC_5_OC

Type Name : BSC_5_OC
Encoding Variation :
Comments : Broadband Sending Complete Octet 5.

Element Name	Type Definition	Field Encoding	Comments
BSC_5_8	BITSTRING[1]		Extension bit
BSC_5_71	BITSTRING[7]		Broadband Sending Complete Indication

CA_IE

Type Name : CA_IE
Encoding Variation :
Comments : Cause IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CA_1	OCTETSTRING[1]		Octet 1, Identifier
CA_2	CA_2_OC		Octet 2, Coding and IE Instruction Field
CA_34	HEXSTRING[4]		Octet 3 and 4, Length of CA IE
CA_5	CA_5_OC		Octet 5, Location
CA_6	BITSTRING[8]		Octet 6, Cause value
CA_7	HEXSTRING		Diagnostic(s)

CA_2_OC

Type Name : CA_2_OC
Encoding Variation :
Comments : Cause Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CA_2_8	BITSTRING[1]		Extension bit
CA_2_76	BITSTRING[2]		Coding Standard
CA_2_51	BITSTRING[5]		IE Instruction Field

CA_5_OC

Type Name : CA_5_OC
Encoding Variation :
Comments : Cause Octet 5.

Element Name	Type Definition	Field Encoding	Comments
CA_5_8	BITSTRING[1]		Extension bit
CA_5_75	BITSTRING[3]		Spare bits
CA_5_41	BITSTRING[4]		Location

CDN_IE

Type Name : CDN_IE
Encoding Variation :
Comments : Called Party Number IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CDN_1	OCTETSTRING[1]		Octet 1, Identifier
CDN_2	CDN_2_OC		Octet 2, Coding and IE Instruction Field
CDN_34	HEXSTRING[4]		Octet 3 and 4, Length of CDN IE
CDN_5	CDN_5_OC		Octet 5, Type of Number and Addressing/numbering Plan Identification
CDN_R	HEXSTRING		Number Digits
CDN_RR	HEXSTRING		Used to exceed the maximum length of CDN IE

CDN_2_OC

Type Name : CDN_2_OC
Encoding Variation :
Comments : Called Party Number Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CDN_2_8	BITSTRING[1]		Extension bit
CDN_2_76	BITSTRING[2]		Coding Standard
CDN_2_51	BITSTRING[5]		IE Instruction Field

CDN_5_OC

Type Name : CDN_5_OC
Encoding Variation :
Comments : Called Party Number Octet 5.

Element Name	Type Definition	Field Encoding	Comments
CDN_5_8	BITSTRING[1]		Extension bit
CDN_5_75	BITSTRING[3]		Type of Number
CDN_5_41	BITSTRING[4]		Numbering Plan Identification

CDS_IE

Type Name : CDS_IE
Encoding Variation :
Comments : Called Party Subaddress IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CDS_1	OCTETSTRING[1]		Octet 1, Identifier
CDS_2	CDS_2_OC		Octet 2, Coding and IE Instruction Field
CDS_34	HEXSTRING[4]		Octet 3 and 4, Length of CDS IE
CDS_5	CDS_5_OC		Octet 5, Type of Subaddress
CDS_R	HEXSTRING		Subaddress Information
CDS_RR	HEXSTRING		Used to exceed the maximum length of CDS IE

CDS_2_OC

Type Name : CDS_2_OC
Encoding Variation :
Comments : Called Party Subaddress Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CDS_2_8	BITSTRING[1]		Extension bit
CDS_2_76	BITSTRING[2]		Coding Standard
CDS_2_51	BITSTRING[5]		IE Instruction Field

CDS_5_OC

Type Name : CDS_5_OC
Encoding Variation :
Comments : Called Party Subaddress Octet 5.

Element Name	Type Definition	Field Encoding	Comments
CDS_5_8	BITSTRING[1]		Extension bit
CDS_5_75	BITSTRING[3]		Type of Subaddress
CDS_5_4	BITSTRING[1]		Odd/Even Indicator
CDS_5_31	BITSTRING[3]		Spare bits

CGN_IE

Type Name : CGN_IE
Encoding Variation :
Comments : Calling Party Number IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CGN_1	OCTETSTRING[1]		Octet 1, Identifier
CGN_2	CGN_2_OC		Octet 2, Coding and IE Instruction Field
CGN_34	HEXSTRING[4]		Octet 3 and 4, Length of CGN IE
CGN_5	CGN_5_OC		Octet 5, Type of Number and Addressing/numbering Plan Identification
CGN_5A	CGN_5A_OC		Octet 5A, Presentation Indicator and Screening Indicator
CGN_R	HEXSTRING		Number Digits

CGN_2_OC

Type Name : CGN_2_OC
Encoding Variation :
Comments : Calling Party Number Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CGN_2_8	BITSTRING[1]		Extension bit
CGN_2_76	BITSTRING[2]		Coding Standard
CGN_2_51	BITSTRING[5]		IE Instruction Field

CGN_5_OC

Type Name : CGN_5_OC
Encoding Variation :
Comments : Calling Party Number Octet 5.

Element Name	Type Definition	Field Encoding	Comments
CGN_5_8	BITSTRING[1]		Extension bit
CGN_5_75	BITSTRING[3]		Type of Number
CGN_5_41	BITSTRING[4]		Addressing/Numbering Plan Identification

CGN_5A_OC

Type Name : CGN_5A_OC
Encoding Variation :
Comments : Calling Party Number Octet 5A.

Element Name	Type Definition	Field Encoding	Comments
CGN_5A_8	BITSTRING[1]		Extension bit
CGN_5A_76	BITSTRING[2]		Presentation Indicator
CGN_5A_53	BITSTRING[3]		Spare bits
CGN_5A_21	BITSTRING[2]		Screening Indicator

CGS_IE

Type Name : CGS_IE
Encoding Variation :
Comments : Calling Party Subaddress IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CGS_1	OCTETSTRING[1]		Octet 1, Identifier
CGS_2	CGS_2_OC		Octet 2, Coding and IE Instruction Field
CGS_34	HEXSTRING[4]		Octet 3 and 4, Length of CGS IE
CGS_5	CGS_5_OC		Octet 5, Type of Subaddress
CGS_R	HEXSTRING		Subaddress Information

CGS_2_OC

Type Name : CGS_2_OC
Encoding Variation :
Comments : Calling Party Subaddress Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CGS_2_8	BITSTRING[1]		Extension bit
CGS_2_76	BITSTRING[2]		Coding Standard
CGS_2_51	BITSTRING[5]		IE Instruction Field

CGS_5_OC

Type Name : CGS_5_OC
Encoding Variation :
Comments : Calling Party Subaddress Octet 5.

Element Name	Type Definition	Field Encoding	Comments
CGS_5_8	BITSTRING[1]		Extension bit
CGS_5_75	BITSTRING[3]		Type of Subaddress
CGS_5_4	BITSTRING[1]		Odd/Even Indicator
CGS_5_31	BITSTRING[3]		Spare bits

CI_IE

Type Name : CI_IE
Encoding Variation :
Comments : Connection Identifier IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CI_1	OCTETSTRING[1]		Octet 1, Identifier
CI_2	CI_2_OC		Octet 2, Coding and IE Instruction Field
CI_34	HEXSTRING[4]		Octet 3 and 4, Length of CI IE
CI_5	CI_5_OC		Octet 5, VP associated Signalling and Preferred/Exclusive
CI_67	HEXSTRING[4]		Octet 6 and 7, Virtual Path Connection Identifier
CI_89	HEXSTRING[4]		Octet 8 and 9, Virtual Channel Identifier
CI_R	HEXSTRING		Used to exceed the maximum length of CI IE

CI_2_OC

Type Name : CI_2_OC
Encoding Variation :
Comments : Connection Identifier Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CI_2_8	BITSTRING[1]		Extension bit
CI_2_76	BITSTRING[2]		Coding Standard
CI_2_51	BITSTRING[5]		IE Instruction Field

CI_5_OC

Type Name : CI_5_OC
Encoding Variation :
Comments : Connection Identifier Octet 5.

Element Name	Type Definition	Field Encoding	Comments
CI_5_8	BITSTRING[1]		Extension bit
CI_5_76	BITSTRING[2]		Spare bits
CI_5_54	BITSTRING[2]		VP Associated Signalling
CI_5_31	BITSTRING[3]		Preferred/Exclusive

CN_IE

Type Name : CN_IE
Encoding Variation :
Comments : Connected Number IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CN_1	OCTETSTRING[1]		Octet 1, Identifier
CN_2	CN_2_OC		Octet 2, Coding and IE Instruction Field
CN_34	HEXSTRING[4]		Octet 3 and 4, Length of CN IE
CN_5	CN_5_OC		Octet 5, Type of Number, Addressing/Numbering PLAN Identification
CN_5A	CN_5A_OC		Octet 5A, Presentation Indicator, Screening Indicator
CN_R	HEXSTRING		Number Digits

CN_2_OC

Type Name : CN_2_OC
Encoding Variation :
Comments : Connected Number Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CN_2_8	BITSTRING[1]		Extension bit
CN_2_76	BITSTRING[2]		Coding Standard
CN_2_51	BITSTRING[5]		IE Instruction Field

CN_5_OC

Type Name : CN_5_OC
Encoding Variation :
Comments : Connected Number Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CN_5_8	BITSTRING[1]		Extension bit
CN_5_75	BITSTRING[3]		Type of Number
CN_5_41	BITSTRING[4]		Addressing/Numbering Plan Identification

CN_5A_OC

Type Name : CN_5A_OC
Encoding Variation :
Comments : Connected Number Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CN_5A_8	BITSTRING[1]		Extension bit
CN_5A_76	BITSTRING[2]		Presentation Indicator
CN_5A_53	BITSTRING[3]		Spare
CN_5A_21	BITSTRING[2]		Screening Indicator

CNS_IE

Type Name : CNS_IE
Encoding Variation :
Comments : Connected SubAddress IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CNS_1	OCTETSTRING[1]		Octet 1, Identifier
CNS_2	CNS_2_OC		Octet 2, Coding and IE Instruction Field
CNS_34	HEXSTRING[4]		Octet 3 and 4, Length of CNS IE
CNS_5	CNS_5_OC		Octet 5, Type of Subaddress, Odd/Even indicator
CNS_R	HEXSTRING		Subaddress Information

CNS_2_OC

Type Name : CNS_2_OC
Encoding Variation :
Comments : Connected Subaddress Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CNS_2_8	BITSTRING[1]		Extension bit
CNS_2_76	BITSTRING[2]		Coding Standard
CNS_2_51	BITSTRING[5]		IE Instruction Field

CNS_5_OC

Type Name : CNS_5_OC
Encoding Variation :
Comments : Connected Number Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CNS_5_8	BITSTRING[1]		Extension bit
CNS_5_75	BITSTRING[3]		Type of Subadress
CNS_5_4	BITSTRING[1]		Odd/Even Indicator
CNS_5_31	BITSTRING[3]		Spare

CR_IE

Type Name : CR_IE
Encoding Variation :
Comments : Call Reference IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CR_1	CR_1_OC		Octet 1, bits 5 to 8 and CR length
CR_234	CR_234_OC		Octet 2, 3 and 4, Flag and CR value

CR_1_OC

Type Name : CR_1_OC
Encoding Variation :
Comments : Call Reference Octet 1.

Element Name	Type Definition	Field Encoding	Comments
CR_1_85	BITSTRING[4]		Bits 5 to 8
CR_1_41	BITSTRING[4]		CR length

CR_234_OC

Type Name : CR_234_OC
Encoding Variation :
Comments : Call Reference Octet 2,3 and 4.

Element Name	Type Definition	Field Encoding	Comments
CR_234_8	BITSTRING[1]		Flag
CR_234_R	BITSTRING[23]		CR value

CS_IE

Type Name : CS_IE
Encoding Variation :
Comments : Call State IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CS_1	OCTETSTRING[1]		Octet 1, Identifier
CS_2	CS_2_OC		Octet 2, Coding and IE Instruction Field
CS_34	HEXSTRING[4]		Octet 3 and 4, Length of CS IE
CS_5	CS_5_OC		Octet 5, Call State value
CS_R	HEXSTRING		Used to exceed the maximum length of CS IE

CS_2_OC

Type Name : CS_2_OC
Encoding Variation :
Comments : Call State Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CS_2_8	BITSTRING[1]		Extension bit
CS_2_76	BITSTRING[2]		Coding Standard
CS_2_51	BITSTRING[5]		IE Instruction Field

CS_5_OC

Type Name : CS_5_OC
Encoding Variation :
Comments : Call State Octet 5.

Element Name	Type Definition	Field Encoding	Comments
CS_5_87	BITSTRING[2]		Spare bits
CS_5_61	BITSTRING[6]		Call State value

CSS_IE

Type Name : CSS_IE
Encoding Variation :
Comments : Connection Scope Selection IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
CSS_1	OCTETSTRING[1]		Octet 1, Identifier
CSS_2	CSS_2_OC		Octet 2, Coding and IE Instruction Field
CSS_34	HEXSTRING[4]		Octet 3 and 4, Length of CSS IE
CSS_5	CSS_5_OC		Octet 5, Type of Connection Scope
CSS_6	OCTETSTRING[1]		Further contents depending upon Type of Connection Scope
CSS_R	HEXSTRING		Used to exceed the maximum length of CSS IE

CSS_2_OC

Type Name : CSS_2_OC
Encoding Variation :
Comments : Connection Scope Selection Octet 2.

Element Name	Type Definition	Field Encoding	Comments
CSS_2_8	BITSTRING[1]		Extension bit
CSS_2_76	BITSTRING[2]		Coding Standard
CSS_2_51	BITSTRING[5]		IE Instruction Field

CSS_5_OC

Type Name : CSS_5_OC
Encoding Variation :
Comments : Connection Scope Selection Octet 5.

Element Name	Type Definition	Field Encoding	Comments
CSS_5_8	BITSTRING[1]		Extension bit
CSS_5_75	BITSTRING[3]		Spare
CSS_5_41	BITSTRING[4]		Type of Connection Scope

EQOS_IE

Type Name : EQOS_IE
Encoding Variation :
Comments : Extended Quality of Service Parameters IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
EQOS_1	OCTETSTRING[1]		Octet 1, Identifier
EQOS_2	EQOS_2_OC		Octet 2, Coding and IE Instruction Field
EQOS_34	HEXSTRING[4]		Octet 3 and 4, Length of EQOS IE
EQOS_5	OCTETSTRING[1]		Octet 5, Origin
EQOS_6	OCTETSTRING[1]		Octet 6, Acceptable Forward Peak-to-peak Cell Delay Variation Identifier
EQOS_6_123	BITSTRING[24]		Octet 6.1, 6.2 and 6.3, Acceptable Forward Peak-to-peak Cell Delay Variation
EQOS_7	OCTETSTRING[1]		Octet 7, Acceptable Backward Peak-to-peak Cell Delay Variation Identifier
EQOS_7_123	BITSTRING[24]		Octet 7.1, 7.2 and 7.3, Acceptable Backward Peak-to-peak Cell Delay Variation
EQOS_8	OCTETSTRING[1]		Octet 8, Cumulative Forward Peak-to-peak Cell Delay Variation Identifier
EQOS_8_123	BITSTRING[24]		Octet 8.1, 8.2 and 8.3, Cumulative Forward Peak-to-peak Cell Delay Variation
EQOS_9	OCTETSTRING[1]		Octet 9, Cumulative Backward Peak-to-peak Cell Delay Variation Identifier
EQOS_9_123	BITSTRING[24]		Octet 9.1, 9.2 and 9.3, Cumulative Backward Peak-to-peak Cell Delay Variation
EQOS_10	OCTETSTRING[1]		Octet 10, Acceptable Forward cell Loss Ratio Identifier
EQOS_10_1	BITSTRING[8]		Octet 10.1, Acceptable Forward cell Loss Ratio
EQOS_11	OCTETSTRING[1]		Octet 11, Acceptable Backward cell Loss Ratio Identifier
EQOS_11_1	BITSTRING[8]		Octet 11.1, Acceptable Backward cell Loss Ratio
EQOS_R	HEXSTRING		Used to exceed the maximum length of EQOS IE

EQOS_2_OC

Type Name : EQOS_2_OC
Encoding Variation :
Comments : Extended Quality of Servic Parameters Octet 2.

Element Name	Type Definition	Field Encoding	Comments
EQOS_2_8	BITSTRING[1]		Extension bit
EQOS_2_76	BITSTRING[2]		Coding Standard
EQOS_2_51	BITSTRING[5]		IE Instruction Field

ER_IE

Type Name : ER_IE
Encoding Variation :
Comments : EndPoint Reference GROUP

Element Name	Type Definition	Field Encoding	Comments
EPR_1	OCTETSTRING[1]		Octet 1, Identifier
EPR_2	ER_2_OC		Octet 2, Coding and IE Instruction Field
EPR_34	HEXSTRING[4]		Octet 3 and 4, Length of EPR IE
EPR_5	OCTETSTRING[1]		Octet 5, Endpoint Reference Type
EPR_67	ER_67_OC		Octet 6 and 7, Endpoint reference identifier value

ER_2_OC

Type Name : ER_2_OC
Encoding Variation :
Comments : EndPoint Reference Octet 2

Element Name	Type Definition	Field Encoding	Comments
EPR_2_8	BITSTRING[1]		Extension bit
EPR_2_76	BITSTRING[2]		Coding Standard
EPR_2_51	BITSTRING[5]		IE Instruction Field

ER_67_OC

Type Name : ER_67_OC
Encoding Variation :
Comments : EndPoint Reference Octet 6 and 7

Element Name	Type Definition	Field Encoding	Comments
EPR_67_8	BITSTRING[1]		EndPoint Reference flag
EPR_67_R	BITSTRING[15]		Endpoint Reference identifier value

ES_IE

Type Name : ES_IE
Encoding Variation :
Comments : Endpoint State IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
ES_1	OCTETSTRING[1]		Octet 1, Identifier
ES_2	ES_2_OC		Octet 2, Coding and IE Instruction Field
ES_34	HEXSTRING[4]		Octet 3 and 4, Length of ES IE
ES_5	ES_5_OC		Octet 5, Endpoint Reference Party State
ES_R	HEXSTRING		Used to exceed the maximum length of ES IE

ES_2_OC

Type Name : ES_2_OC
Encoding Variation :
Comments : Endpoint State Octet 2.

Element Name	Type Definition	Field Encoding	Comments
ES_2_8	BITSTRING[1]		Extension bit
ES_2_76	BITSTRING[2]		Coding Standard
ES_2_51	BITSTRING[5]		IE Instruction Field

ES_5_OC

Type Name : ES_5_OC
Encoding Variation :
Comments : Endpoint State Octet 2.

Element Name	Type Definition	Field Encoding	Comments
ES_5_87	BITSTRING[2]		Spare
ES_5_61	BITSTRING[6]		Endpoint Reference Party State

ETD_IE

Type Name : ETD_IE
Encoding Variation :
Comments : End-to-End Transit Delay GROUP

Element Name	Type Definition	Field Encoding	Comments
ETD_1	OCTETSTRING[1]		Octet 1, Identifier
ETD_2	ETD_2_OC		Octet 2, Coding and IE Instruction Field
ETD_34	HEXSTRING[4]		Octet 3 and 4, Length of ETD IE
ETD_5	OCTETSTRING[1]		Octet 5, Cumulative transit delay identifier
ETD_67	OCTETSTRING[2]		Octet 6 and 7, Cumulative transit delay value
ETD_8	OCTETSTRING[1]		Octet 8, Maximum end-to-end transit delay identifier
ETD_910	OCTETSTRING[2]		Octet 9 and 10, Maximum end-to-end transit delay value
ETD_11	OCTETSTRING[1]		Octet 11, Network generated identifier
ETD_R	HEXSTRING		Used to exceed the maximum length of ETD IE

ETD_2_OC

Type Name : ETD_2_OC
Encoding Variation :
Comments : End-to-End Transit Delay Octet 2

Element Name	Type Definition	Field Encoding	Comments
ETD_2_8	BITSTRING[1]		Extension bit
ETD_2_76	BITSTRING[2]		Coding Standard
ETD_2_51	BITSTRING[5]		IE Instruction Field

GIT_IE

Type Name : GIT_IE
Encoding Variation :
Comments : Generic identifier transport IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
GIT_1	OCTETSTRING[1]		Octet 1, Identifier
GIT_2	GIT_2_OC		Octet 2, Coding and IE Instruction Field
GIT_34	HEXSTRING[4]		Octet 3 and 4, Length of GIT IE
GIT_5	OCTETSTRING[1]		Octet 5, Identifier related standard/application
GIT_R	HEXSTRING		6th octet up to 33th octet .
GIT_RR	HEXSTRING		used to exceed the maximum length of GIT IE

GIT_2_OC

Type Name : GIT_2_OC
Encoding Variation :
Comments : Restart Indicator Octet 2.

Element Name	Type Definition	Field Encoding	Comments
GIT_2_8	BITSTRING[1]		Extension bit
GIT_2_76	BITSTRING[2]		Coding Standard
GIT_2_51	BITSTRING[5]		IE Instruction Field

MATD_IE

Type Name : MATD_IE
Encoding Variation :
Comments : Minimum ATM Traffic Descriptor IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
MATD_1	OCTETSTRING[1]		Octet 1, Identifier
MATD_2	MATD_2_OC		Octet 2, Coding and IE Instruction Field
MATD_34	HEXSTRING[4]		Octet 3 and 4, Length of MATD IE
MATD_5	OCTETSTRING[1]		Octet 5, Forward Peak Cell Rate Identifier (CLP=0)
MATD_5_1_2_3	HEXSTRING[6]		Octet 5.1, 5.2 and 5.3 , Forward Peak Cell Rate
MATD_6	OCTETSTRING[1]		Octet 6, Backward Peak Cell Rate Identifier (CLP=0)
MATD_6_1_2_3	HEXSTRING[6]		Octet 6.1, 6.2 and 6.3, Backward Peak Cell Rate
MATD_7	OCTETSTRING[1]		Octet 7, Forward Peak Cell Rate Identifier (CLP=0+1)
MATD_7_1_2_3	HEXSTRING[6]		Octet 7.1, 7.2 and 7.3, Forward Peak Cell Rate
MATD_8	OCTETSTRING[1]		Octet 8, Backward Peak Cell Rate Identifier (CLP=0+1)
MATD_8_1_2_3	HEXSTRING[6]		Octet 8.1, 8.2 and 8.3, Backward Peak Cell Rate
MATD_9	OCTETSTRING[1]		Octet 19, Forward ABR Minimum Cell Rate Identifier (CLP=0+1)
MATD_9_1_2_3	HEXSTRING[6]		Octet 19.1, 19.2 and 19.3, Forward ABR Minimum Cell Rate.
MATD_10	OCTETSTRING[1]		Octet 20, Backward ABR Minimum Cell Rate Identifier (CLP=0+1)
MATD_10_1_2_3	HEXSTRING[6]		Octet 20.1, 20.2 and 20.3, Forward ABR Minimum Cell Rate.
MATD_R	HEXSTRING		Used to exceed the maximum length of MATD IE

MATD_2_OC

Type Name : MATD_2_OC
Encoding Variation :
Comments : Minimum ATM Traffic Descriptor Octet 2.

Element Name	Type Definition	Field Encoding	Comments
MATD_2_8	BITSTRING[1]		Extension bit
MATD_2_76	BITSTRING[2]		Coding Standard
MATD_2_51	BITSTRING[5]		IE Instruction Field

ML_IE

Type Name : ML_IE
Encoding Variation :
Comments : Message Length IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
ML_12	HEXSTRING[4]		Octet 1 and 2, length of the message

MT_IE

Type Name : MT_IE
Encoding Variation :
Comments : Message Type IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
MT_1	OCTETSTRING[1]		Octet 1, Identifier
MT_2	MT_2_OC		Octet 2, Flag and Action Indicator

MT_2_OC

Type Name : MT_2_OC
Encoding Variation :
Comments : Message Type Octet 2.

Element Name	Type Definition	Field Encoding	Comments
MT_2_8	BITSTRING[1]		Extension bit
MT_2_76	BITSTRING[2]		Spare
MT_2_5	BITSTRING[1]		Flag
MT_2_43	BITSTRING[2]		Spare
MT_2_21	BITSTRING[2]		IE Action Indicator

NI_IE

Type Name : NI_IE
Encoding Variation :
Comments : Notification Indicator GROUP

Element Name	Type Definition	Field Encoding	Comments
NI_1	OCTETSTRING[1]		Octet 1, Identifier
NI_2	NI_2_OC		Octet 2, Coding and IE Instruction Field
NI_34	HEXSTRING[4]		Octet 3 and 4, Length of NI IE
NI_5	OCTETSTRING[1]		Octet 5, Notification Indicator Information
NI_R	HEXSTRING		to exceed the maximum length

NI_2_OC

Type Name : NI_2_OC
Encoding Variation :
Comments : Notification Indicator Octet 2

Element Name	Type Definition	Field Encoding	Comments
NI_2_8	BITSTRING[1]		Extension bit
NI_2_76	BITSTRING[2]		Coding Standard
NI_2_51	BITSTRING[5]		IE Instruction Field

QOS_IE

Type Name : QOS_IE
Encoding Variation :
Comments : Quality of Service Parameter IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
QOS_1	OCTETSTRING[1]		Octet 1, Identifier
QOS_2	QOS_2_OC		Octet 2, Coding and IE Instruction Field
QOS_34	HEXSTRING[4]		Octet 3 and 4, Length of QOS IE
QOS_5	BITSTRING[8]		Octet 5, Qos Class Forward
QOS_6	BITSTRING[8]		Octet 6, Qos Class Backward
QOS_R	HEXSTRING		Used to exceed the maximum length of QOS IE

QOS_2_OC

Type Name : QOS_2_OC
Encoding Variation :
Comments : Quality of Service Parameter Octet 2.

Element Name	Type Definition	Field Encoding	Comments
QOS_2_8	BITSTRING[1]		Extension bit
QOS_2_76	BITSTRING[2]		Coding Standard
QOS_2_51	BITSTRING[5]		IE Instruction Field

RI_IE

Type Name : RI_IE
Encoding Variation :
Comments : Restart Indicator IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
RI_1	OCTETSTRING[1]		Octet 1, Identifier
RI_2	RI_2_OC		Octet 2, Coding and IE Instruction Field
RI_34	HEXSTRING[4]		Octet 3 and 4, Length of RI IE
RI_5	RI_5_OC		Octet 5, Class
RI_R	HEXSTRING		Used to exceed the maximum length of RI IE

RI_2_OC

Type Name : RI_2_OC
Encoding Variation :
Comments : Restart Indicator Octet 2.

Element Name	Type Definition	Field Encoding	Comments
RI_2_8	BITSTRING[1]		Extension bit
RI_2_76	BITSTRING[2]		Coding Standard
RI_2_51	BITSTRING[5]		IE Instruction Field

RI_5_OC

Type Name : RI_5_OC
Encoding Variation :
Comments : Restart Indicator Octet 5.

Element Name	Type Definition	Field Encoding	Comments
RI_5_8	BITSTRING[1]		Extension bit
RI_5_74	BITSTRING[4]		Spare bits
RI_5_31	BITSTRING[3]		Class

TNS_IE

Type Name : TNS_IE
Encoding Variation :
Comments : Transit Network Selection IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
TNS_1	OCTETSTRING[1]		Octet 1, Identifier
TNS_2	TNS_2_OC		Octet 2, Coding and IE Instruction Field
TNS_34	HEXSTRING[4]		Octet 3 and 4, Length of TNS IE
TNS_5	TNS_5_OC		Octet 5, Type of Network Identification and Network Identification Plan
TNS_R	HEXSTRING[2]		Network Identification (IA5String)

TNS_2_OC

Type Name : TNS_2_OC
Encoding Variation :
Comments : Transit Network Selection Octet 2.

Element Name	Type Definition	Field Encoding	Comments
TNS_2_8	BITSTRING[1]		Extension bit
TNS_2_76	BITSTRING[2]		Coding Standard
TNS_2_51	BITSTRING[5]		IE Instruction Field

TNS_5_OC

Type Name : TNS_5_OC
Encoding Variation :
Comments : Transit Network Selection Octet 5.

Element Name	Type Definition	Field Encoding	Comments
TNS_5_8	BITSTRING[1]		Extension bit
TNS_5_75	BITSTRING[3]		Type of Network Identification
TNS_5_41	BITSTRING[4]		Network Identification Plan

UN_IE

Type Name : UN_IE
Encoding Variation :
Comments : Unrecognized IE GROUP.

Element Name	Type Definition	Field Encoding	Comments
UN_1	OCTETSTRING[1]		Octet 1, Identifier
UN_2	UN_2_OC		Octet 2, Flag and Action Indicator
UN_34	HEXSTRING[4]		Octet 3 and 4, length of the IE
UN_5	OCTETSTRING[1]		

UN_2_OC

Type Name : UN_2_OC
Encoding Variation :
Comments : Unrecognized IE Octet 2.

Element Name	Type Definition	Field Encoding	Comments
UN_2_8	BITSTRING[1]		Extension bit
UN_2_76	BITSTRING[2]		Coding Standard
UN_2_5	BITSTRING[1]		Flag
UN_2_43	BITSTRING[2]		Spare
UN_2_21	BITSTRING[2]		IE Action Indicator

Test Suite Parameter Declarations

Parameter Name	Type	PICS/PIXIT Ref	Comments
AAL1_INFO	HEXSTRING		AAL Parameters information type 1
AAL1_LEN	INTEGER		Length of AAL IE (with type 1)
AAL5_INFO	HEXSTRING		AAL Parameters information type 5
AAL5_LEN	INTEGER		Length of AAL IE (with type 5)
ABR_SUPP	BOOLEAN	TR.17 PIXIT	True if the ATM Service Category ABR is supported
ADDRESS_FORMAT	INTEGER	A.1 PIXIT	1 if Public address (E.164) 0 if Private address (NSAP)
ALL_USE	BOOLEAN	C.2 PIXIT	True if the IUT can be configured with all VPCI and VCI busy
ALL_USE_VP	BOOLEAN	C.2 PIXIT	True if the IUT can be configured with all VPCI and VCI busy
ATD_ABR_MinCR	INTEGER	TR.22PIXIT	ABR Minimum Cell Rate (Forward and Backward).
ATD_BE_SUPP	BOOLEAN	TR.14 PIXIT	True if Best Effort is supported
ATD_MBS0_VBR	INTEGER	TR.10 PIXIT	Valid Maximum Burst Size (CLP=0) for BBC Class C and X/VBR (Forward and Backward)
ATD_MBS1_VBR	INTEGER	TR.13 PIXIT	Valid Maximum Burst Size (CLP=1) for BBC Class C and X/VBR (Forward and Backward)
ATD_PCR0_ABR	INTEGER	TR.7 PIXIT	Valid Peak Cell Rate (CLP=0) for BBC Class C and X/ABR (Forward and Backward)
ATD_PCR0_CBR	INTEGER	TR.7 PIXIT	Valid Peak Cell Rate (CLP=0) for BBC Class A and X/CBR (Forward and Backward)
ATD_PCR0_SUPP	BOOLEAN	TR.6 PIXIT	True if Peak Cell Rate (CLP = 0) is supported
ATD_PCR0_VBR	INTEGER	TR.7 PIXIT	Valid Peak Cell Rate (CLP=0) for BBC Class C and X/VBR (Forward and Backward)
ATD_PCR1_ABR	INTEGER	TR.5 PIXIT	Valid Peak Cell Rate (CLP=0+1) for BBC Class C and X/ABR (Forward and Backward)
ATD_PCR1_CBR	INTEGER	TR.5 PIXIT	Valid Peak Cell Rate (CLP=0+1) for BBC Class A and X/CBR (Forward and Backward)

Test Suite Parameter Declarations

Parameter Name	Type	PICS/PIXIT Ref	Comments
ATD_PCR1_VBR	INTEGER	TR.5 PIXIT	Valid Peak Cell Rate (CLP=0+1) for BBC Class C and X/VBR (Forward and Backward)
ATD_SCR0_SUPP	BOOLEAN	TR.8 PIXIT	True if Sustainable Cell Rate and Maximum Burst Size (CLP = 0) is supported
ATD_SCR0_VBR	INTEGER	TR.9 PIXIT	Valid Sustainable Cell Rate (CLP=0) for BBC Class C and X/VBR (Forward and Backward)
ATD_SCR1_SUPP	BOOLEAN	TR.11 PIXIT	True if Sustainable Cell Rate and Maximum Burst Size (CLP = 0+1) is supported
ATD_SCR1_VBR	INTEGER	TR.12 PIXIT	Valid Sustainable Cell Rate (CLP=1) for BBC Class C and X/VBR (Forward and Backward)
ATM_ANYCAST_SUPP	BOOLEAN	A.12 PIXIT	True if ATM Anycast is supported
BBC_A_SUPP	BOOLEAN	TR.1 PIXIT	True if the Broadband Bearer Capability Class A is supported
BBC_C_SUPP	BOOLEAN	TR.2 PIXIT	True if the Broadband Bearer Capability Class C is supported
BBC_VP_SUPP	BOOLEAN	TR.4 PIXIT	True if the Broadband Bearer Capability Class Transparent VP is supported
BBC_X_SUPP	BOOLEAN	TR.3 PIXIT	True if the Broadband Bearer Capability Class X is supported
BHL_INFO	HEXSTRING		Valid High Layer Information
BHL_LEN	INTEGER		Length of BHL IE (with BHL_INFO)
BHL_SUPP	BOOLEAN	O.7 PIXIT	True if the IUT supports the BHL IE
BHL_TYPE	BITSTRING		High layer Information Type
BLL_INFO	HEXSTRING		Valid BLL Information
BLL_LEN	INTEGER		Length of BLL IE (with BLL_INFO)
BLL_REP	BOOLEAN	O.6 PIXIT	True if the IUT supports the repetition of BLL IE
BLL_TRANS	BOOLEAN	O.9 PIXIT	True if the IUT transports BLL to the Calling User in Connect message
CBR_SUPP	BOOLEAN	TR.18 PIXIT	True if the ATM Service Category CBR is supported

Test Suite Parameter Declarations

Parameter Name	Type	PICS/PIXIT Ref	Comments
CDN_INV_LEN	INTEGER		Length of CDN IE (with A.4-A.11)
CDN_INV_NP	BITSTRING		Invalid Numbering Plan for T reference received in an incoming SETUP (CDN) at T PCO
CDN_INV_TN	BITSTRING		Invalid Type of Number for T reference received in an incoming SETUP (CDN) at T PCO
CDN_R1_DN	HEXSTRING	A.3 PIXIT	Valid Address of R1 reference point. This is the CDN sent in an Outgoing SETUP from T PCO
CDN_R1_LEN	INTEGER		Length of CDN IE (with A.3-A.7)
CDN_R1_NP	BITSTRING		Numbering Plan for R1 reference sent in an outgoing SETUP (CDN) from T PCO
CDN_R1_TN	BITSTRING		Type of Number for R1 reference sent in an outgoing SETUP (CDN) from T PCO
CDN_T_DN	HEXSTRING	A.2 PIXIT	Valid Address of T reference point. This is the CDN received in an incoming SETUP at T PCO
CDN_T_LEN	INTEGER		Length of CDN IE (with A.2-A.5)
CDN_T_NP	BITSTRING		Numbering Plan for T reference received in an incoming SETUP (CDN) at T PCO
CDN_T_OUT_DN	HEXSTRING		Valid Address of T reference point. This is the CDN sent in an Outgoing SETUP from R1 PCO
CDN_T_OUT_INVALID_DN	HEXSTRING		Invalid Address of T reference point. This is the CDN sent in an Outgoing SETUP from R1 PCO
CDN_T_OUT_INVALID_LEN	INTEGER		Length of CDN IE (with A.2-A.5)
CDN_T_OUT_LEN	INTEGER		Length of CDN IE (with A.2-A.5)
CDN_T_OUT_NP	BITSTRING		Numbering Plan for T reference sent in an outgoing SETUP (CDN) from R1 PCO
CDN_T_OUT_TN	BITSTRING		Type of Number for T reference sent in an outgoing SETUP (CDN) from R1 PCO
CDN_T_TN	BITSTRING		Type of Number for T reference received in an incoming SETUP (CDN) at T PCO
CDS_DN	HEXSTRING		Valid Called Party Subaddress
CDS_LEN	INTEGER		Length of CDS IE (with CDS_DN)
CDS_REP	BOOLEAN		True if the IUT supports the repetition of CDS IE

Test Suite Parameter Declarations

Parameter Name	Type	PICS/PIXIT Ref	Comments
CGN_INCLUDE	BOOLEAN	O.5 PIXIT	True if the IUT needs CGN IE in the SETUP message
CGN_R1_INC_DN	HEXSTRING	A.3 PIXIT	Valid Address of R1 reference. This is the CGN received in an incoming SETUP at T PCO
CGN_R1_INC_NP	BITSTRING		Numbering Plan for R1 reference received in an incoming SETUP (CGN) at T PCO
CGN_R1_INC_TN	BITSTRING		Type of Number for R1 reference received in an incoming SETUP (CGN) at T PCO
CGN_R1_LEN	INTEGER		Length of CGN IE (with A2-A.6, Octet 5A is absent)
CGN_R1_OUT_DN	HEXSTRING		Valid Address of R1 reference. This is the CGN sent in an outgoing SETUP from R1 PCO
CGN_R1_OUT_LEN	INTEGER		Length of CGN IE (with A.3-A.8, Octet 5A is absent)
CGN_R1_OUT_NP	BITSTRING		Numbering plan for R1 reference sent in an outgoing SETUP (CGN) from R1 PCO
CGN_R1_OUT_TN	BITSTRING		Type of Number for R1 reference sent in an outgoing SETUP (CGN) from R1 PCO
CGN_T_DN	HEXSTRING	A.2 PIXIT	Valid Address of T reference. This is the CGN sent in an outgoing SETUP from T PCO
CGN_T_LEN	INTEGER		Length of CGN IE (with A2-A.6, Octet 5A is absent)
CGN_T_NP	BITSTRING		Numbering Plan for T reference sent in an outgoing SETUP (CGN) from T PCO
CGN_T_TN	BITSTRING		Type of Number for T reference sent in an outgoing SETUP (CGN) from T PCO
CGN_V2_DN	HEXSTRING		equal to CGN_T_DN if CGN_INCLUDE is true, otherwise its empty
CGN_V2_LEN	INTEGER		equal to the length of CGN IE (from T reference) if CGN_INCLUDE is true (its used when CGN is mandatory in the SETUP message). Otherwise its equal to 0
CGN_V2_OCT1	OCTETSTRING		equal to '6C'0 if CGN_INCLUDE is true, otherwise its empty

Test Suite Parameter Declarations

Parameter Name	Type	PICS/PIXIT Ref	Comments
CGS_DN	HEXSTRING		Valid Calling Party subaddress
CGS_LEN	INTEGER		Length of CGS IE (with CGS_DN)
CGS_REP	BOOLEAN		True if the IUT supports the repetition of CGS IE
CGS_TYPE	BITSTRING		Type of Subaddress for Calling Party
DELTA	INTEGER	TV.6 PIXIT	Value for the delay (in s) in processing and transferring messages between the IUT and the tester
FOLLOW	BOOLEAN	O.14 PIXIT	True if the IUT follows the content of Action Indicator when MT Flag=1
FR_DISCARD_SUPP	BOOLEAN	O.17 PIXIT	True if the IUT supports the Frame Discard capability
GEN_CALL_PROC	BOOLEAN	O.1 PIXIT	True if the IUT generates a CALL PROCEEDING message after receiving a SETUP message
GEN_STATUS	BOOLEAN	O.2 PIXIT	True if the IUT sends a STATUS after receiving a message with unrecognized IE or IE content error
GEN_STATUS_ENQ	BOOLEAN	O.3 PIXIT	True if the IUT sends a STATUS ENQUIRY after data link error (AAL reset)
GIT_LEN	INTEGER		Identifier related standard/application
GIT_OCT5	OCTETSTRING		Identifier related standard/application
GIT_OCT6N	HEXSTRING		octet 6th up to 33.
GIT_REP	BOOLEAN		True if the IUT supports the repetition of GIT IE
GIT_SUPP	BOOLEAN	O.15 PIXIT	True if the IUT supports the GIT IE
NATP_SUPP	BOOLEAN	O.16 PIXIT	True if Negotiation of ATM traffic parameter is supported
QOS_CLASS1_SUPP	BOOLEAN	TR.15 PIXIT	True if QOS Class 1 is supported
QOS_CLASS3_SUPP	BOOLEAN	TR.16 PIXIT	True if QOS Class 3 is supported
RESTART_PROC	BOOLEAN	C.1 PIXIT	True if the Tester performs the Restart Procedure at the beginning of any test case
RETRANS_SETUP	BOOLEAN	O.4 PIXIT	True if the IUT re-sends SETUP after the first expiry of timer T303
T303value	INTEGER	TV.1 PIXIT	Value for Timer T303 (in s)
T308value	INTEGER	TV.2 PIXIT	Value for Timer T308 (in s)

Test Suite Parameter Declarations

Parameter Name	Type	PICS/PIXIT Ref	Comments
T309value	INTEGER	TV.3 PIXIT	Value for Timer T309 (in s)
T310value	INTEGER	TV.4 PIXIT	Value for Timer T310 (in s)
T322value	INTEGER	TV.5 PIXIT	Value for Timer T322 (in s)
TNS_NOT_RECOGNIZED	HEXSTRING	O.12 Pixit	TNS Network identification is unrecognized in the SETUP
TNS_NOT_RECOGNIZED_LEN	INTEGER		Length of TNS IE (with O.12)
TNS_NOT_VALID	HEXSTRING	O.13 PIXIT	TNS Network identification is not valid in the SETUP
TNS_NOT_VALID_LEN	INTEGER		Length of TNS IE (with O.13)
TNS_SUPP	BOOLEAN	O.10 PIXIT	True if the IUT supports the TNS IE
TNS_VALID	HEXSTRING	O.11 PIXIT	Valid Transit Network Identification
TNS_VALID_LEN	INTEGER		Length of TNS IE (with O.6)
Tsvalue	INTEGER	T.1 PIXIT	Value for a timer (in s) that is sufficiently long for the IUT to respond. It is used when a response is expected from the IUT
Tvlvalue	INTEGER	T.3 PIXIT	Value for a timer (in s) that is longer than the longest IUT implemented timer. It is used to verify the reception of message from the IUT (used in Timer group)
Twvalue	INTEGER	T.2 PIXIT	Value for a timer that is shorter than the shortest IUT implemented timer (in s). It is used when no response is expected from the IUT
UBR_SUPP	BOOLEAN	TR.19 PIXIT	True if the ATM Service Category UBR is supported
VCI	INTEGER		Vci value for test cases that includes CI in the SETUP
VCI_V1	INTEGER		Valid Vci Value
VPCI	INTEGER		Vpci value for test cases that includes CI in the SETUP
VPCI_V1	INTEGER		Valid Vpci Value
nrtVBR_SUPP	BOOLEAN	TR.20 PIXIT	True if the ATM Service Category nrt-VBR is supported
rtVBR_SUPP	BOOLEAN	TR.21 PIXIT	True if the ATM Service Category rt-VBR is supported

Test Suite Variable Declarations

Variable Name	Type	Value	Comments
Lower_Limit	INTEGER		Used in CHECKTIMER to calculate the lower limit of the timer range
NB_Rest	INTEGER		Number of Restart send to IUT (used in in the Initialisation step)
R1_Cref1	BITSTRING		Call reference value at R1 reference. 1st call
R1_Cref2	BITSTRING		Call reference value at R1 reference. 2nd call
R1_FlagR1	BITSTRING		Call reference Flag used in received messages at R1 reference. 1st call
R1_FlagR2	BITSTRING		Call reference Flag used in received messages at R1 reference. 2nd call
R1_FlagS1	BITSTRING		Call reference Flag used in sent messages at R1 reference. 1st call
R1_FlagS2	BITSTRING		Call reference Flag used in sent messages at R1 reference. 2nd call
T_Cref1	BITSTRING		Call reference value at T reference. 1st Call
T_Cref2	BITSTRING		Call reference value at T reference. 2nd call
T_FlagR1	BITSTRING		Call reference Flag used in reveived messages at T reference. 1st call
T_FlagR2	BITSTRING		Call reference Flag used in received messages at T reference. 2nd call
T_FlagS1	BITSTRING		Call reference Flag used in sent messages at T reference. 1st call
T_FlagS2	BITSTRING		Call reference Flag used in sent messages at T reference. 2nd call
Timer_In_Range	BOOLEAN	FALSE	Flag used to determine if a timer is in the proper range
Upper_Limit	INTEGER		Used in CHECKTIMER to calculate the Upper limit of the timer range
Vci1	INTEGER		VCI value at T reference. 1st call
Vci2	INTEGER		VCI value at T reference. 2nd call
VciR1	INTEGER		VCI value at R1 reference. 1st call
VciR2	INTEGER		VCI value at R1 reference. 2nd call
Vpci1	INTEGER		VPCI value at T reference. 1st call
Vpci2	INTEGER		VPCI value at T reference. 2nd call

Variable Name	Type	Value	Comments
VpciR1	INTEGER		VPCI value at R1 reference. 1st call
VpciR2	INTEGER		VPCI value at R1 reference. 2nd call
temp	INTEGER		Used to save timer value

PCO Type Declarations

PCO Type	Role	Comments
S_SAP	LT	

PCO Declarations

PCO Name	PCO Type	Role	Comments
T	S_SAP	LT	Signalling Service Acces Point at the Lower Tester for the 1st terminal appearance. The tested point
R1	S_SAP	LT	Signalling Service Acces Point at the Lower Tester for the 2nd terminal appearance. The reference point

Timer Declarations

Timer Name	Duration	Unit	Comments
Ts	Tsvalue	s	A timer that is sufficiently long for the IUT to respond. It is used when a response is expected from the IUT
Tw	Twvalue	s	A timer that is shorter than the shortest IUT implemented timer. It is used when no response is expected from the IUT
T303	T303value	s	T303 timer
T308	T308value	s	T308 timer
T309	T309value	s	T309 timer
T310	T310value	s	T310 timer
T322	T322value	s	T322 timer
Tvl	Tvlvalue	s	A timer that is longer than the longest IUT implemented timer. It is used to verify the IUT timers duration (used in timers group)

ALERT

PDU Name : ALERT
PCO Type : S_SAP
Encoding Rule Name :
Encoding Variation :
Comments : ALERTING message.

CDN_5_41	'1111'B		Invalid Numbering Plan

Detailed Comments : Invalid Called Party Number octet 5. Invalid Numbering Plan =1111B

CDN_5_V1

Constraint Name : CDN_5_V1(TON,NP:BITSTRING)
Structured Type : CDN_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDN_5_8	'1B		
CDN_5_75	TON		
CDN_5_41	NP		

CDN_5_V1r

Constraint Name : CDN_5_V1r
Structured Type : CDN_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDN_5_8	'1'B		
CDN_5_75	?		
CDN_5_41	?		

CDS_V1

Constraint Name : CDS_V1
Structured Type : CDS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_1	IE_CDS		
CDS_2	CDS_2_V1		
CDS_34	INT_TO_HEX(CDS_LEN -4,4)		
CDS_5	CDS_5_V1		
CDS_R	CDS_DN		
CDS_RR	-		Used to exceed the maximum length of CDS IE

CDS_2_V1

Constraint Name : CDS_2_V1
Structured Type : CDS_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_2_8	'1'B		
CDS_2_76	'00'B		
CDS_2_51	'00000'B		

CDS_5_V1

Constraint Name : CDS_5_V1
Structured Type : CDS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_5_8	'1'B		
CDS_5_75	CDS_TYPE		
CDS_5_4	'0'B		
CDS_5_31	'000'B		

CDS_5_V1r

Constraint Name : CDS_5_V1r
Structured Type : CDS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_5_8	'1'B		
CDS_5_75	CDS_TYPE		
CDS_5_4	?		
CDS_5_31	?		

Detailed Comments : Valid Called Party Subaddress Octet 5 received from IUT

CDS_N1

Constraint Name : CDS_N1
Structured Type : CDS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_1	IE_CDS		
CDS_2	CDS_2_V1		
CDS_34	INT_TO_HEX((CDS_LEN+25) -4,4)		
CDS_5	CDS_5_V1		
CDS_R	CDS_DN		
CDS_RR	'0102030405060708090A0B0C0D0E0 F10111213141516171819'H		to exceed the maximum length

Detailed Comments : Invalid Called Party Subaddress IE (length exceed the maximum) sent to IUT

CDS_N2

Constraint Name : CDS_N2
Structured Type : CDS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_1	IE_CDS		
CDS_2	CDS_2_V1		
CDS_34	INT_TO_HEX(CDS_LEN -4,4)		
CDS_5	CDS_5_N1		invalid type=111B
CDS_R	CDS_DN		
CDS_RR	-		

Detailed Comments : Invalid Called Party Subaddress IE (type=111B) sent to IUT

CDS_N3

Constraint Name : CDS_N3
Structured Type : CDS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_1	IE_CDS		
CDS_2	CDS_2_V1		
CDS_34	INT_TO_HEX(CDS_LEN -4,4)		
CDS_5	CDS_5_N2		spare =111B
CDS_R	CDS_DN		
CDS_RR	-		

Detailed Comments : Invalid Called Party Subaddress IE (spare =111B) sent to IUT

CDS_5_N1

Constraint Name : CDS_5_N1
Structured Type : CDS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_5_8	'1'B		
CDS_5_75	'111'B		invalid type
CDS_5_4	'0'B		
CDS_5_31	'000'B		

Detailed Comments : Invalid Called Party Subaddress Octet 5 (type =111B) sent to IUT

CDS_5_N2

Constraint Name : CDS_5_N2
Structured Type : CDS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CDS_5_8	'1'B		
CDS_5_75	CDS_TYPE		
CDS_5_4	'0'B		
CDS_5_31	'111'B		spare =111B

Detailed Comments : invalid Called Party Subaddress Octet 5 (spare=111B) sent to IUT

CGN_V1

Constraint Name : CGN_V1(LEN:INTEGER;TYPE,NP:BITSTRING;DIGITS:HEXSTRING)
Structured Type : CGN_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGN_1	IE_CGN		
CGN_2	CGN_2_V1

CGN_5A	-		
CGN_R	CGN_V3_DN		

CGN_V3_OCT2

Constraint Name : CGN_V3_OCT2
Structured Type : CGN_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGN_2_8	CGN_V3_OCT2_8		
CGN_2_76	CGN_V3_OCT2_76		
CGN_2_51	CGN_V3_OCT2_51		

CGN_V3_OCT5

Constraint Name : CGN_V3_OCT5
Structured Type : CGN_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGN_5_8	CGN_V3_OCT5_8		
CGN_5_75	CGN_V3_OCT5_TN		
CGN_5_41	CGN_V3_OCT5_NP		

CGN_5_V1rtemp

Constraint Name : CGN_5_V1rtemp
Structured Type : CGN_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGN_5_8	?		
CGN_5_75	?		'001'B
CGN_5_41	?		'0010'B

Detailed Comments : Valid Calling Party Number Octet 5 received from IUT

CGN_5A_V2rtemp

Constraint Name : CGN_5A_V2rtemp
Structured Type : CGN_5A_OC
Derivation Path :
Encoding Variation :
Comments : Calling Party Number Octet 5A.

Element Name	Element Value	Element Encoding	Comments
CGN_5A_8	'1'B		Extension bit
CGN_5A_76	'00'B		Presentation Indicator
CGN_5A_53	'000'B		Spare bits
CGN_5A_21	'??'B		Screening Indicator

CGS_V1

Constraint Name : CGS_V1
Structured Type : CGS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_1	IE_CGS		
CGS_2	CGS_2_V1		
CGS_34	INT_TO_HEX(CGS_LEN - 4,4)		
CGS_5	CGS_5_V1		
CGS_R	CGS_DN		

CGS_V1r

Constraint Name : CGS_V1r
Structured Type : CGS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_1	IE_CGS		
CGS_2	CGS_2_V1		
CGS_34	INT_TO_HEX(CGS_LEN - 4,4)		
CGS_5	CGS_5_V1r		
CGS_R	CGS_DN		

Detailed Comments : Valid Calling Party Subaddress IE received from IUT

CGS_2_V1

Constraint Name : CGS_2_V1
Structured Type : CGS_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_2_8	'1'B		
CGS_2_76	'00'B		
CGS_2_51	'00000'B		

CGS_5_V1

Constraint Name : CGS_5_V1
Structured Type : CGS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_5_8	'1'B		
CGS_5_75	CGS_TYPE		
CGS_5_4	'0'B		
CGS_5_31	'000'B		

CGS_5_V1r

Constraint Name : CGS_5_V1r
Structured Type : CGS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_5_8	'1'B		
CGS_5_75	CGS_TYPE		
CGS_5_4	?		
CGS_5_31	?		

Detailed Comments : Valid Calling Party Subaddress Octet 5 received from IUT

CGS_N1

Constraint Name : CGS_N1
Structured Type : CGS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_1	IE_CGS		
CGS_2	CGS_2_V1		
CGS_34	INT_TO_HEX(CGS_LEN - 4,4)		
CGS_5	CGS_5_N1		invalid type
CGS_R	CGS_DN		

Detailed Comments : Invalid Calling Party Subaddress IE (type=111B) sent to IUT

CGS_N2

Constraint Name : CGS_N2
Structured Type : CGS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_1	IE_CGS		
CGS_2	CGS_2_V1		
CGS_34	INT_TO_HEX(CGS_LEN - 4,4)		
CGS_5	CGS_5_N2		spare =111B
CGS_R	CGS_DN		

Detailed Comments : Invalid Calling Party Subaddress IE (spare =111B) sent to IUT

CGS_5_N1

Constraint Name : CGS_5_N1
Structured Type : CGS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_5_8	'1'B		
CGS_5_75	'111'B		invalid type
CGS_5_4	'0'B		
CGS_5_31	'000'B		

Detailed Comments : Invalid Calling Party Subaddress Octet 5 (type =111B) sent to IUT

CGS_5_N2

Constraint Name : CGS_5_N2
Structured Type : CGS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CGS_5_8	'1'B		
CGS_5_75	CGS_TYPE		
CGS_5_4	'0'B		
CGS_5_31	'111'B		invalid spare

Detailed Comments : Invalid Calling Party Subaddress Octet 5 (spare =111B) sent to IUT

CI_N1

Constraint Name : CI_N1(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_V1		
CI_34	INT_TO_HEX(6,4)		
CI_5	CI_5_V1		
CI_67	INT_TO_HEX(Vpi,4)		
CI_89	INT_TO_HEX(Vci,4)		
CI_R	'01'H		to exceed the maximum length of CI IE

Detailed Comments : Invalid Connection Identifier IE. Length of CI IE =10 (exceed the maximum)

CI_N2

Constraint Name : CI_N2(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_V1		
CI_34	INT_TO_HEX(5,4)		
CI_5	CI_5_N1		Invalid VP Assoc. Sign
CI_67	INT_TO_HEX(Vpi,4)		
CI_89	INT_TO_HEX(Vci,4)		
CI_R	-		

Detailed Comments : Invalid Connection Identifier IE. Invalid VP associated sign=11B

CI_N3

Constraint Name : CI_N3(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_V1		
CI_34	INT_TO_HEX(5,4)		
CI_5	CI_5_N2		Invalid Preferred/Exclusive
CI_67	INT_TO_HEX(Vpi,4)		
CI_89	INT_TO_HEX(Vci,4)		
CI_R	-		

Detailed Comments : Invalid Connection Identifier IE. Invalid Preferred/Exclusive =111B

CI_N4

Constraint Name : CI_N4(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_V1		
CI_34	INT_TO_HEX(5,4)		
CI_5	CI_5_N3		Invalid Spare bits
CI_67	INT_TO_HEX(Vpi,4)		
CI_89	INT_TO_HEX(Vci,4)		
CI_R	-		

Detailed Comments : Connection Identifier IE. Invalid Spare bits=11B

CI_N5

Constraint Name : CI_N5(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_N1		Invalid Coding
CI_34	INT_TO_HEX(5,4)		
CI_5	CI_5_V1		
CI_67	INT_TO_HEX(Vpi,4)		
CI_89	INT_TO_HEX(Vci,4)		
CI_R	-		

Detailed Comments : Invalid Connection Identifier IE. Invalid Coding =01B

CI_N6

Constraint Name : CI_N6(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_V6		IE header/flag = 1, indicator = 000B
CI_34	INT_TO_HEX(6,4)		
CI_5	CI_5_V1		
CI_67	INT_TO_HEX(Vpi,4)		
CI_89	INT_TO_HEX(Vci,4)		
CI_R	'01'H		to exceed the maximum length of CI IE

Detailed Comments : Invalid Connection Identifier IE. Length of CI IE =10 (exceed the maximum)

CI_N7

Constraint Name : CI_N7(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_V7		IE header/flag = 1, indicator = 101B
CI_34	INT_TO_HEX(6,4)		
CI_5	CI_5_N1		Invalid VP Assoc. Sign
CI_67	INT_TO_HEX(Vpi,4)		
CI_89	INT_TO_HEX(Vci,4)		
CI_R	-		

Detailed Comments : Invalid Connection Identifier IE. Invalid VP associated sign=11B

CI_N8

Constraint Name : CI_N8(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_N2		Invalid Coding=01B, IE/header/flag =1, indicator = 110B
CI_34	INT_TO_HEX(5,4)		
CI_5	CI_5_V1		
CI_67	INT_TO_HEX(Vpi,4)		
CI_89	INT_TO_HEX(VCI,4)		
CI_R	-		

Detailed Comments : Invalid Connection Identifier IE. Invalid Coding =01B, IE/header/flag =1, indicator = 110B

CI_V1

Constraint Name : CI_V1(Vpi,Vci:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_V1		
CI_34	INT_TO_HEX(5,4)

CI_67	INT_TO_HEX(VPI,4)		
CI_89	?		
CI_R	-		

CI_V4r

Constraint Name : CI_V4r(VPI:INTEGER)
Structured Type : CI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_1	IE_CI		
CI_2	CI_2_V1		
CI_34	INT_TO_HEX(5,4)		
CI_5	CI_5_V4r		
CI_67	INT_TO_HEX(VPI,4)		
CI_89	?		
CI_R	-		

CI_2_N1

Constraint Name : CI_2_N1
Structured Type : CI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_2_8	'1'B		
CI_2_76	'01'B		Invalid Coding
CI_2_51	'00000'B		

Detailed Comments : Invalid CI Octet 2. Invalid Coding =01B

CI_2_N2

Constraint Name : CI_2_N2
Structured Type : CI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_2_8	'1'B		
CI_2_76	'01'B		Invalid Coding
CI_2_51	'10110'B		IE/header/flag =1, indicator = 110B

Detailed Comments : Invalid CI Octet 2. Invalid Coding =01B, IE/header/flag =1, indicator = 110B

CI_2_V1

Constraint Name : CI_2_V1
Structured Type : CI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_2_8	'1'B		
CI_2_76	'00'B		
CI_2_51	'00000'B		

CI_2_V6

Constraint Name : CI_2_V6
Structured Type : CI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_2_8	'1'B		
CI_2_76	'00'B		
CI_2_51	'10000'B		IE header/flag = 1, indicator = 000B

Detailed Comments : Valid CI, octet 2.

CI_2_V7

Constraint Name : CI_2_V7
Structured Type : CI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_2_8	'1'B		
CI_2_76	'00'B		
CI_2_51	'10101'B		IE header/flag = 1, indicator = 101B

Detailed Comments : Valid CI, octet 2.

CI_5_N1

Constraint Name : CI_5_N1
Structured Type : CI_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_5_8	'1'B		
CI_5_76	'00'B		
CI_5_54	'11'B		Invalid VP Associated Signalling
CI_5_31	'000'B		

Detailed Comments : Invalid Connection Identifier Octet 5. Associated signalling=11B

CI_5_N2

Constraint Name : CI_5_N2
Structured Type : CI_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_5_8	'1'B		
CI_5_76	'00'B		
CI_5_54	'01'B		
CI_5_31	'111'B		Invalid Preferred/Exclusive

Detailed Comments : Invalid Connection Identifier Octet 5. preferred/Exclusive =111B

CI_5_N3

Constraint Name : CI_5_N3
Structured Type : CI_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
CI_5_8	'1'B		
CI_5_76	'11'B		Invalid Spare bits
CI_5_54	'01'B		
CI_5_31	'000'B		

Detailed Comments : Connection Identifier Octet 5. Invalid Spare bits =11B

Comments : Recieve ETD with only Oct 8 and Oct 9.

Element Name	Element Value	Element Encoding	Comments
EQOS_1	IE_EQOS		Octet 1, Identifier
EQOS_2	EQOS_2_V1		Octet 2, Coding and IE Instruction Field
EQOS_34	?		Octet 3 and 4, Length of EQOS IE
EQOS_5	'00'O		Octet 5, Origin
EQOS_6	-		Octet 6, Acceptable Forward Peak-to-peak Cell Delay Variation Identifier
EQOS_6_123	-		Octet 6.1, 6.2 and 6.3, Acceptable Forward Peak-to-peak Cell Delay Variation
EQOS_7	-		Octet 7, Acceptable Backward Peak-to-peak Cell Delay Variation Identifier
EQOS_7_123	-		Octet 7.1, 7.2 and 7.3, Acceptable Backward Peak-to-peak Cell Delay Variation
EQOS_8	'96'O		Octet 8, Cumulative Forward Peak-to-peak Cell Delay Variation Identifier
EQOS_8_123	INT_TO_BIT(1,24)		Octet 8.1, 8.2 and 8.3, Cumulative Forward Peak-to-peak Cell Delay Variation
EQOS_9	'97'O		Octet 9, Cumulative Backward Peak-to-peak Cell Delay Variation Identifier
EQOS_9_123	INT_TO_BIT(1,24)		Octet 9.1, 9.2 and 9.3, Cumulative Backward Peak-to-peak Cell Delay Variation
EQOS_10	-		Octet 10, Acceptable Forward cell Loss Ratio Identifier
EQOS_10_1	-		Octet 10.1, Acceptable Forward cell Loss Ratio
EQOS_11	-		Octet 11, Acceptable Backward cell Loss Ratio Identifier
EQOS_11_1	-		Octet 11.1, Acceptable Backward cell Loss Ratio
EQOS_R	-		

EQOS_2_N1

Constraint Name : EQOS_2_N1
Structured Type : EQOS_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
EQOS_2_8	'1'B		
EQOS_2_76	'01'B		Invalid coding standard
EQOS_2_51	'00000'B		

Detailed Comments : Invalid EQOS Octet 2. Invalid coding standard = 01B

EQOS_2_V1

Constraint Name : EQOS_2_V1
Structured Type : EQOS_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
EQOS_2_8	'1'B		
EQOS_2_76	'11'B		ATM Forum Specific
EQOS_2_51	'00000'B		

ETD_V1

Constraint Name : ETD_V1
Structured Type : ETD_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
ETD_1	IE_ETD		
ETD_2	ETD_2_V1		
ETD_34	INT_TO_HEX(6,4)		
ETD_5	'01'O		Cumulative transit delay identifier
ETD_67	'000A'O		Valid Cumulative transit delay value
ETD_8	'03'O		Maximum end-to-end transit delay identifier
ETD_910	'00AA'O		Valid Maximum end-to-end transit delay value
ETD_11	-		
ETD_R	-		

ETD_2_V1

Constraint Name : ETD_2_V1
Structured Type : ETD_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
ETD_2_8	'1'B		
ETD_2_76	'00'B		
ETD_2_51	'00000'B		

ETD_2_N1

Constraint Name : ETD_2_N1
Structured Type : ETD_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
ETD_2_8	'1'B		
ETD_2_76	'10'B		Coding standard = 10'B
ETD_2_51	'00000'B		

ETD_N1

Constraint Name : ETD_N1
Structured Type : ETD_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
ETD_1	IE_ETD		
ETD_2	ETD_2_V1		
ETD_34	INT_TO_HEX(24,4)		
ETD_5	'01'O		Cumulative transit delay identifier
ETD_67	'000A'O		Valid Cumulative transit delay value
ETD_8	'03'O		Maximum end-to-end transit delay identifier
ETD_910	'00AA'O		Valid Maximum end-to-end transit delay value
ETD_11	-		
ETD_R	'0102030405060708090A0B0C0D0E0F111213'H		to exceed the maximum length

Detailed Comments : Invalid ETD IE (length exceeds the maximum)

ETD_N2

Constraint Name : ETD_N2
Structured Type : ETD_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
ETD_1	IE_ETD		
ETD_2	ETD_2_V1		
ETD_34	INT_TO_HEX(6,4)		
ETD_5	'FF'O		Unrecognized identifier = 11111111B
ETD_67	'000A'O		Valid Cumulative transit delay value
ETD_8	'03'O		Maximum end-to-end transit delay identifier
ETD_910	'00AA'O		Valid Maximum end-to-end transit delay value
ETD_11	-		
ETD_R	-		to exceed the maximum length

Detailed Comments : ETD/Unrecognized identifier = 11111111B

ETD_N3

Constraint Name : ETD_N3
Structured Type : ETD_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
ETD_1	IE_ETD		
ETD_2	ETD_2_N1		Coding standard = 10'B
ETD_34	INT_TO_HEX(6,4)		
ETD_5	'01'O		Cumulative transit delay identifier
ETD_67	'000A'O		Valid Cumulative transit delay value
ETD_8	'03'O		Maximum end-to-end transit delay identifier
ETD_910	'00AA'O		Valid Maximum end-to-end transit delay value
ETD_11	-		
ETD_R	-		

Detailed Comments : ETD/coding standard = 10'B

GIT_V1

Constraint Name : GIT_V1
Structured Type : GIT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
GIT_1	IE_GIT		
GIT_2	GIT_2_V1		
GIT_34	INT_TO_HEX(GIT_LEN-4,4)		
GIT_5	GIT_OCT5		5th octet in GIT
GIT_R	GIT_OCT6N		6th up 33
GIT_RR	-		

GIT_2_V1

Constraint Name : GIT_2_V1
Structured Type : GIT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
GIT_2_8	'1'B		
GIT_2_76	'00'B		
GIT_2_51	'00000'B		

MATD_VA1

Constraint Name : MATD_VA1
Structured Type : MATD_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments

MATD_2_8	'1'B		
MATD_2_76	'00'B		
MATD_2_51	'00000'B		

MT_V1

Constraint Name : MT_V1(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_V1		

MT_V1r

Constraint Name : MT_V1r(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_V1r		

MT_V2

Constraint Name : MT_V2(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_V2		

Detailed Comments : Valid Message Type IE sent in the message

MT_V3

Constraint Name : MT_V3(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_V3		

Detailed Comments : Valid Message Type IE sent in the message

MT_V4

Constraint Name : MT_V4(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_V4		

Detailed Comments : Valid Message Type IE sent in the message

MT_N1

Constraint Name : MT_N1(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_N1		Invalid Octet 2 Flag=1 and AI=01 (Ignore)

Detailed Comments : Invalid Message Type IE (Octet 2, Flag =1 and AI =01=ignore)

MT_N2

Constraint Name : MT_N2(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_N2		Invalid Octet 2 Flag=1 and AI=10 (Discard and Status)

Detailed Comments : Invalid Message Type IE (Octet 2, Flag =1 and AI =10=Discard an status)

MT_N3

Constraint Name : MT_N3(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_N3		Invalid Octet 2 Flag=1 and AI=00 (Clear call)

Detailed Comments : Invalid Message Type IE (Octet 2, Flag =1 and AI =00=Clear call)

MT_N4

Constraint Name : MT_N4(ID:OCTETSTRING)
Structured Type : MT_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_1	ID		
MT_2	MT_2_N4		Invalid Octet 2 Flag=1 and AI=11 (Reserved)

Detailed Comments : Invalid Message Type IE (Octet 2, Flag =1 and AI =11=Reserved)

MT_2_V1

Constraint Name : MT_2_V1
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	'00'B		
MT_2_5	'0'B		
MT_2_43	'00'B		
MT_2_21	'00'B		

MT_2_V1r

Constraint Name : MT_2_V1r
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	?		
MT_2_5	'0'B		
MT_2_43	?		
MT_2_21	'00'B		

MT_2_V2

Constraint Name : MT_2_V2
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	'00'B		
MT_2_5	'1'B		Follow explicit instructions
MT_2_43	'00'B		
MT_2_21	'00'B		Clear call

Detailed Comments : Valid Message Type octet 2 sent in the message

MT_2_V3

Constraint Name : MT_2_V3
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	'00'B		
MT_2_5	'1'B		Follow explicit instructions
MT_2_43	'00'B		
MT_2_21	'01'B		Discard and ignore

Detailed Comments : Valid Message Type octet 2 sent in the message

MT_2_V4

Constraint Name : MT_2_V4
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	'00'B		
MT_2_5	'1'B		Follow explicit instructions
MT_2_43	'00'B		
MT_2_21	'10'B		Discard and report status

Detailed Comments : Valid Message Type octet 2 sent in the message

MT_2_N1

Constraint Name : MT_2_N1
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	'00'B		
MT_2_5	'1'B		Invalid Flag
MT_2_43	'00'B		
MT_2_21	'01'B		Ignore

Detailed Comments : Invalid Message Type octet 2 (Flag =1 AI =01=ignore)

MT_2_N2

Constraint Name : MT_2_N2
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	'00'B		
MT_2_5	'1'B		Invalid Flag
MT_2_43	'00'B		
MT_2_21	'10'B		Discard and send Status

Detailed Comments : Invalid Message Type octet 2 (Flag =1 AI =10=Discard and send Status)

MT_2_N3

Constraint Name : MT_2_N3
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	'00'B		
MT_2_5	'1'B		Invalid Flag
MT_2_43	'00'B		
MT_2_21	'00'B		Clear call

Detailed Comments : Invalid Message Type octet 2 (Flag =1 AI =10=Discard and send Status)

MT_2_N4

Constraint Name : MT_2_N4
Structured Type : MT_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
MT_2_8	'1'B		
MT_2_76	'00'B		
MT_2_5	'1'B		Invalid Flag
MT_2_43	'00'B		
MT_2_21	'11'B		Reserved

Detailed Comments : Invalid Message Type octet 2 (Flag =1 AI =11=Reserved)

ML_V1

Constraint Name : ML_V1(LEN:INTEGER)
Structured Type : ML_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
ML_12	INT_TO_HEX(LEN,4)		

NI_V1

Constraint Name : NI_V1
Structured Type : NI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
NI_1	IE_NI		
NI_2	NI_2_V1		
NI_34	INT_TO_HEX(1,4)		
NI_5	'00'O		Valid Notification indicator information
NI_R	-		

NI_2_V1

Constraint Name : NI_2_V1
Structured Type : NI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
NI_2_8	'1'B		
NI_2_76	'00'B		
NI_2_51	'00000'B		

NI_N1

Constraint Name : NI_N1
Structured Type : NI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
NI_1	IE_NI		
NI_2	NI_2_V1		
NI_34	INT_TO_HEX(19,4)		
NI_5	'00'O		Valid Notification indicator information
NI_R	'0102030405060708090A0B0C0D0E0 F111213'H		to exceed the maximum length

Detailed Comments : Invalid NI IE (length exceeds the maximum)

NI_N2

Constraint Name : NI_N2
Structured Type : NI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
NI_1	IE_NI		
NI_2	NI_2_N1		Invalid coding standard '10'B
NI_34	INT_TO_HEX(1,4)		
NI_5	'00'O		Valid Notification indicator information
NI_R	-		to exceed the maximum length

Detailed Comments : Invalid NI IE (!)

NI_2_N1

Constraint Name : NI_2_N1
Structured Type : NI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
NI_2_8	'1'B		
NI_2_76	'10'B		Invalid coding standard
NI_2_51	'00000'B		

QOS_N0

Constraint Name : QOS_N0
Structured Type : QOS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
QOS_1	IE_QOS		
QOS_2	QOS_2_V1		
QOS_34	INT_TO_HEX(3,4)		
QOS_5	'00000000'B		
QOS_6	'00000000'B		
QOS_R	'01'H		to exceed the maximum length of QOS IE

Detailed Comments : Invalid Quality of Service IE (class 0, length of QOS = 7, maximum exceeded) sent to IUT

QOS_N01

Constraint Name : QOS_N01
Structured Type : QOS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
QOS_1	IE_QOS		
QOS_2	QOS_2_N1		Invalid coding standard
QOS_34	INT_TO_HEX(2,4)		
QOS_5	'00000000'B		
QOS_6	'00000000'B		
QOS_R	-		

Detailed Comments : Invalid Quality of Service IE (class 0, invalid coding standard = 01B) sent to IUT

QOS_N02

Constraint Name : QOS_N02
Structured Type : QOS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
QOS_1	IE_QOS		
QOS_2	QOS_2_V1		
QOS_34	INT_TO_HEX(2,4)		
QOS_5	'11110000'B		Invalid Forward Class
QOS_6	'00000000'B		
QOS_R	-		

Detailed Comments : Invalid Quality of Service IE, Class 0, Invalid Forward Class=11110000B

QOS_N03

Constraint Name : QOS_N03
Structured Type : QOS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
QOS_1	IE_QOS		
QOS_2	QOS_2_V1		
QOS_34	INT_TO_HEX(2,4)		
QOS_5	'00000000'B		
QOS_6	'11110000'B		Invalid Backward Class
QOS_R	-		

Detailed Comments : Invalid Quality of Service IE, Class 0, Invalid Backward Class =11110000B

QOS_V0

RI_N1

Constraint Name : RI_N1(CLASS:BITSTRING)
Structured Type : RI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_1	IE_RI		
RI_2	RI_2_V1		
RI_34	INT_TO_HEX(2,4)		
RI_5	RI_5_V1(CLASS)		
RI_R	'01'H		to exceed the maximum length of RI IE

Detailed Comments : Invalid Restart Indicator IE. Length of RI IE=6 (exceed the maximum)

RI_N2

Constraint Name : RI_N2(CLASS:BITSTRING)
Structured Type : RI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_1	IE_RI		
RI_2	RI_2_N1		Invalid Coding
RI_34	INT_TO_HEX(1,4)		
RI_5	RI_5_V1(CLASS)		
RI_R	-		

Detailed Comments : Invalid Restart Indicator IE. Invalid coding=01B

RI_N3

Constraint Name : RI_N3(CLASS:BITSTRING)
Structured Type : RI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_1	IE_RI		
RI_2	RI_2_V1		
RI_34	INT_TO_HEX(1,4)		
RI_5	RI_5_N1(CLASS)		Invalid Spare bits
RI_R	-		

Detailed Comments : Invalid Restart Indicator IE. Invalid spare bits=1111B

RI_N4

Constraint Name : RI_N4(CLASS:BITSTRING)
Structured Type : RI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_1	IE_RI		
RI_2	RI_2_N4		IE header/flag=1, indicator=101B
RI_34	INT_TO_HEX(2,4)		
RI_5	RI_5_V1(CLASS)		
RI_R	'01'H		to exceed the maximum length of RI IE

Detailed Comments : Invalid Restart Indicator IE. Length of RI IE=6 (to exceed the maximum), IE header/flag=1, indicator=101B

RI_V1

Constraint Name : RI_V1(CLASS:BITSTRING)
Structured Type : RI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_1	IE_RI		
RI_2	RI_2_V1		
RI_34	INT_TO_HEX(1,4)		
RI_5	RI_5_V1(CLASS)		
RI_R	-		

RI_V1r

Constraint Name : RI_V1r(CLASS:BITSTRING)
Structured Type : RI_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_1	IE_RI		
RI_2	RI_2_V1		
RI_34	INT_TO_HEX(1,4)		
RI_5	RI_5_V1r(CLASS)		
RI_R	-		

RI_2_N1

Constraint Name : RI_2_N1
Structured Type : RI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_2_8	'1'B		
RI_2_76	'01'B		Invalid Coding
RI_2_51	'00000'B		

Detailed Comments : Invalid RI Octet 2. Invalid coding =01B

RI_2_N4

Constraint Name : RI_2_N4
Structured Type : RI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_2_8	'1'B		
RI_2_76	'00'B		
RI_2_51	'01101'B		IE header/flag=1, indicator=101B

Detailed Comments : Invalid RI Octet 2. , IE header/flag=1, indicator=101B

RI_2_V1

Constraint Name : RI_2_V1
Structured Type : RI_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_2_8	'1'B		
RI_2_76	'00'B		
RI_2_51	'00000'B		

RI_5_N1

Constraint Name : RI_5_N1(CLASS:BITSTRING)
Structured Type : RI_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_5_8	'1'B		
RI_5_74	'1111'B		Invalid Spare bits
RI_5_31	CLASS		

Detailed Comments : Invalid Restart Indicator Octet 5. Invalid spare =1111B

RI_5_V1

Constraint Name : RI_5_V1(CLASS:BITSTRING)
Structured Type : RI_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_5_8	'1'B		
RI_5_74	'0000'B		
RI_5_31	CLASS		

RI_5_V1r

Constraint Name : RI_5_V1r(CLASS:BITSTRING)
Structured Type : RI_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
RI_5_8	'1'B		
RI_5_74	?		
RI_5_31	CLASS		

TNS_V1

Constraint Name : TNS_V1
Structured Type : TNS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_1	IE_TNS		
TNS_2	TNS_2_V1		
TNS_34	INT_TO_HEX(TNS_VALID_LEN -4,4)		
TNS_5	TNS_5_V1		
TNS_R	TNS_VALID		

TNS_2_V1

Constraint Name : TNS_2_V1
Structured Type : TNS_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_2_8	'1'B		
TNS_2_76	'00'B		
TNS_2_51	'00000'B		

TNS_5_V1

Constraint Name : TNS_5_V1
Structured Type : TNS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_5_8	'1'B		
TNS_5_75	'010'B		
TNS_5_41	'0001'B		

TNS_N1

Constraint Name : TNS_N1
Structured Type : TNS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_1	IE_TNS		
TNS_2	TNS_2_V1		
TNS_34	INT_TO_HEX(TNS_VALID_LEN -4,4)		
TNS_5	TNS_5_N1		invalid type of network
TNS_R	TNS_VALID		

Detailed Comments : Invalid Transit Network Selection (type of network=111B) IE

TNS_N2

Constraint Name : TNS_N2
Structured Type : TNS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_1	IE_TNS		
TNS_2	TNS_2_V1		
TNS_34	INT_TO_HEX(TNS_VALID_LEN -4,4)		
TNS_5	TNS_5_N2		invalid network id
TNS_R	TNS_VALID		

Detailed Comments : Invalid Transit Network Selection (network id=1111B) IE

TNS_N3

Constraint Name : TNS_N3
Structured Type : TNS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_1	IE_TNS		
TNS_2	TNS_2_V1		
TNS_34	INT_TO_HEX(TNS_NOT_RECOGNIZED_LEN -4,4)		
TNS_5	TNS_5_V1		
TNS_R	TNS_NOT_RECOGNIZED		

Detailed Comments : Invalid Transit Network Selection IE (Network identification Not recognized)

TNS_N4

Constraint Name : TNS_N4
Structured Type : TNS_IE
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_1	IE_TNS		
TNS_2	TNS_2_V1		
TNS_34	INT_TO_HEX(TNS_NOT_VALID_LEN -4,4)		
TNS_5	TNS_5_V1		
TNS_R	TNS_NOT_VALID		

Detailed Comments : Invalid Transit Network Selection IE (Network identification Not valid)

TNS_5_N1

Constraint Name : TNS_5_N1
Structured Type : TNS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_5_8	'1'B		
TNS_5_75	'111'B		invalid type of network
TNS_5_41	'0001'B		

Detailed Comments : Invalid Transit Network Selection (type of network =111B) Octet 5

TNS_5_N2

Constraint Name : TNS_5_N2
Structured Type : TNS_5_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
TNS_5_8	'1'B		
TNS_5_75	'010'B		
TNS_5_41	'1111'B		invalid network id

Detailed Comments : Invalid Transit Network Selection Octet 5 (network id =1111B)

UN_V1

Constraint Name : UN_V1
Structured Type : UN_IE
Derivation Path :
Encoding Variation :
Comments : Unexpected IE with flag = 0, i.e. regular error handling procedures apply.

Element Name	Element Value	Element Encoding	Comments
UN_1	IE_UN		
UN_2	UN_2_V1		
UN_34	INT_TO_HEX(1,4)		
UN_5	'00'O		

Detailed Comments : Unrecognized IE sent in the message

UN_2_V1

Constraint Name : UN_2_V1
Structured Type : UN_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
UN_2_8	'1'B		
UN_2_76	'00'B		
UN_2_5	'0'B		
UN_2_43	'00'B		
UN_2_21	'00'B		

Detailed Comments : Unrecognized IE octet 2 sent in the message

UN_V2

Constraint Name : UN_V2
Structured Type : UN_IE
Derivation Path :
Encoding Variation :
Comments : Unexpected IE with flag = 1 and indicator = 000B, i.e. follow explicit instruction clear call.

Element Name	Element Value	Element Encoding	Comments
UN_1	IE_UN		
UN_2	UN_2_V2		
UN_34	INT_TO_HEX(1,4)		
UN_5	'00'O		

Detailed Comments : Unrecognized IE sent in the message

UN_2_V2

Constraint Name : UN_2_V2
Structured Type : UN_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
UN_2_8	'1'B		
UN_2_76	'00'B		
UN_2_5	'1'B		
UN_2_43	'00'B		
UN_2_21	'00'B		

Detailed Comments : Unrecognized IE octet 2 sent in the message

UN_V3

Constraint Name : UN_V3
Structured Type : UN_IE
Derivation Path :
Encoding Variation :
Comments : Unexpected IE with flag = 1 and indicator = 110B, i.e. follow explicit instruction discard message and report status.

Element Name	Element Value	Element Encoding	Comments
UN_1	IE_UN		
UN_2	UN_2_V3		
UN_34	INT_TO_HEX(1,4)		
UN_5	'00'O		

Detailed Comments : Unrecognized IE sent in the message

UN_2_V3

Constraint Name : UN_2_V3
Structured Type : UN_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
UN_2_8	'1'B		
UN_2_76	'00'B		
UN_2_5	'1'B		
UN_2_43	'01'B		
UN_2_21	'10'B		

Detailed Comments : Unrecognized IE octet 2 sent in the message

UN_V4

Constraint Name : UN_V4
Structured Type : UN_IE
Derivation Path :
Encoding Variation :
Comments : Unexpected IE with flag = 1 and indicator = 010B, i.e. follow explicit instruction discard IE, proceed and report status.

Element Name	Element Value	Element Encoding	Comments
UN_1	IE_UN		
UN_2	UN_2_V4		
UN_34	INT_TO_HEX(1,4)		
UN_5	'00'O		

Detailed Comments : Unrecognized IE sent in the message

UN_2_V4

Constraint Name : UN_2_V4
Structured Type : UN_2_OC
Derivation Path :
Encoding Variation :
Comments :

Element Name	Element Value	Element Encoding	Comments
UN_2_8	'1'B		
UN_2_76	'00'B		
UN_2_5	'1'B		
UN_2_43	'00'B		
UN_2_21	'10'B		

Detailed Comments : Unrecognized IE octet 2 sent in the message

UN_V5

Constraint Name : UN_V5
Structured Type : UN_IE
Derivation Path :
Encoding Variation :
Comments : Unexpected IE with flag = 1 and indicator = 101B, i.e. follow explicit instruction discard message and ignore.

Element Name	Element Value	Element Encoding	Comments
UN_1	IE_UN		
UN_2	UN_2_V5		
UN_34	INT_TO_HEX(1,4)		
UN_5	'00'O		

Detailed Comments : Unrecognized IE sent in the message

UN_2_V5

Constraint Name : UN_2_V5
Structured Type : UN_2_OC
Derivation Path :
Encoding Variation :
Comments : Unexpected IE with flag = 1 and indicator = 101B, i.e. follow explicit instruction discard message and ignore.

Element Name	Element Value	Element Encoding	Comments
UN_2_8	'1'B		
UN_2_76	'00'B		
UN_2_5	'1'B		
UN_2_43	'01'B		
UN_2_21	'01'B		

Detailed Comments : Unrecognized IE octet 2 sent in the message

AL_r1v

Constraint Name : AL_r1v(FLAG,CALL_REF:BITSTRING)
PDU Type : ALERT
Derivation Path :

Detailed Comments : Invalid CALL PROCEEDING sent to IUT (with unrecognized IE)

CP_s21ibbc

Constraint Name : CP_s21ibbc(FLAG,CALL_REF:BITSTRING)
PDU Type : CALL_PROC_UN
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(6)		
CI	-		
UN	-		
BBC	BBC_VA1		unexpected recognized IE

Detailed Comments : Invalid CALL PROCEEDING sent to IUT (with unexpected recognized BBC IE)

CP_s22inil

Constraint Name : CP_s22inil(FLAG,CALL_REF:BITSTRING)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(6)		
CI	-		
NI	NI_N1		length of NI = maximum length +1
ER	-		

Detailed Comments : Invalid CALL PROCEEDING sent to IUT (with length of NI = maximum length +1)

CP_s22icilhind000

Constraint Name : CP_s22icilhind000(FLAG,CALL_REF:BITSTRING;VP,VC:INTEGER)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(10)		
CI	CI_N6(VP,VC)		Invalid CI.length =10, IE header/flag = 1, indicator = 000B
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (CI length = 10, IE header/flag = 1, indicator = 000B) sent to IUT

CP_s23icis101

Constraint Name : CP_s23icis101(FLAG,CALL_REF:BITSTRING;VP,VC:INTEGER)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(9)		
CI	CI_N7(VP,VC)		Invalid CI, invalid VP associated signal, IE/header/flag = 1, indicator = 101B
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (CI associated signal=11B, invalid VP associated signal, IE/header/flag = 1, indicator = 101B) sent to IUT

CP_s23inic

Constraint Name : CP_s23inic(FLAG,CALL_REF:BITSTRING)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(5)		
CI	-		
NI	NI_N2		coding standard = 10B
ER	-		

Detailed Comments : Invalid CALL PROCEEDING sent to IUT (with coding standard = 10B)

CP_s3icr58

Constraint Name : CP_s3icr58(FLAG,CALL_REF:BITSTRING)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_N1(FLAG,CALL_REF)		Invalid CR. non-zero bits 5-8 octet 1
MT	MT_V1(MT_CP)		
ML	ML_V1(0)		
CI	-		
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (CR non-zero bits 5-8 octet 1) sent to IUT

CP_s4icr3

Constraint Name : CP_s4icr3(FLAG,CALL_REF:BITSTRING)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_N2(FLAG,CALL_REF)		Invalid CR. length not equal to 3
MT	MT_V1(MT_CP)		
ML	ML_V1(0)		
CI	-		
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (CR length not equal to 3) sent to IUT

CP_s5icil

Constraint Name : CP_s5icil(FLAG,CALL_REF:BITSTRING;VP,VC:INTEGER)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(10)		
CI	CI_N1(VP,VC)		invalid CI.length =10
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (CI length = 10) sent to IUT

CP_s6icis

Constraint Name : CP_s6icis(FLAG,CALL_REF:BITSTRING;VP,VC:INTEGER)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(9)		
CI	CI_N2(VP,VC)		Invalid CI. invalid VP associated signal
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (CI associaed signal=11B) sent to IUT

CP_s7icix

Constraint Name : CP_s7icix(FLAG,CALL_REF:BITSTRING;VP,VC:INTEGER)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(9)		
CI	CI_N3(VP,VC)		Invalid CI. invalid preferred
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (CI preferred=111B) sent to IUT

CP_s8icip

Constraint Name : CP_s8icip(FLAG,CALL_REF:BITSTRING;VP,VC:INTEGER)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(9)		
CI	CI_N4(VP,VC)		Invalid CI. spare =11B
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (CI spare =11B) sent to IUT

CP_s9il

Constraint Name : CP_s9il(FLAG,CALL_REF:BITSTRING)
PDU Type : CALL_PROC
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_CP)		
ML	ML_V1(10)		Invalid ML. Message length error
CI	-		
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid CALL PROCEEDING (message length error) sent to IUT

NO_r100

Constraint Name : NO_r100
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1r(?)		
MT	MT_V1(MT_NO)		
ML	?		
NI	?		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Valid NOTIFY received from IUT

NO_r2vni

Constraint Name : NO_r2vni(FLAG:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1r(FLAG)		
MT	MT_V1(MT_NO)		
ML	?		
NI	NI_V1		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Valid NOTIFY (with NI) received from IUT

NO_s1ipdisc

Constraint Name : NO_s1ipdisc(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	IPD_ID		Invalid PD
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	ML_V1(0)		
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid NOTIFY (PD error) sent to IUT

NO_s1v

Constraint Name : NO_s1v(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	ML_V1(0)		
NI	NI_V1		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Valid NOTIFY sent to IUT

NO_s2ishort

Constraint Name : NO_s2ishort(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	-		
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid NOTIFY (too short) sent to IUT

NO_s20inic

Constraint Name : NO_s20inic(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	ML_V1(5)		
NI	NI_N2		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid NOTIFY sent to IUT with Ni/Coding standard = '10'B.

NO_s20inil

Constraint Name : NO_s20inil(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	ML_V1(23)		
NI	NI_N1		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid NOTIFY sent to IUT with the length of Ni exceeding the maximum length.

NO_s20iun

Constraint Name : NO_s20iun(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY_UN
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	ML_V1(5 + 5)		
NI	NI_V1		Notification Indicator IE
ER	-		Endpoint Reference IE
UN	UN_V1		unrecognized IE

Detailed Comments : Invalid NOTIFY sent to IUT with unrecognized IE

NO_s21iun

Constraint Name : NO_s21iun(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY_UN
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	ML_V1(5 + 5)		
NI	NI_V1		Notification Indicator IE
ER	-		Endpoint Reference IE
UN	UN_V3		unrecognized IE

Detailed Comments : Invalid NOTIFY sent to IUT with unrecognized IE

NO_s3icr58

Constraint Name : NO_s3icr58(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_N1(FLAG,CALL_REF)		Invalid CR. non-zero bits 5-8 octet 1
MT	MT_V1(MT_NO)		
ML	ML_V1(0)		
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid NOTIFY (CR non-zero bits 5-8 octet 1) sent to IUT

NO_s4idup

Constraint Name : NO_s4idup(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY_REP
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	ML_V1(5 + 5)		
NI_OCC1	NI_V1		Notification Indicator IE (1st)
NI_OCC2	NI_V1		Notification Indicator IE (2nd)
ER_OCC1	-		Endpoint Reference IE (1st)
ER_OCC2	-		Endpoint Reference IE (2nd)

Detailed Comments : Invalid NOTIFY (duplicated NI) sent to IUT

NO_s5icr3

Constraint Name : NO_s5icr3(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_N2(FLAG,CALL_REF)		Invalid CR. length not equal to 3
MT	MT_V1(MT_NO)		
ML	ML_V1(0)		
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid NOTIFY (CR length not equal to 3) sent to IUT

NO_s8il

Constraint Name : NO_s8il(FLAG,CALL_REF:BITSTRING)
PDU Type : NOTIFY
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		Invalid PD
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_NO)		
ML	ML_V1(10)		Invalid ML. Message Length error
NI	-		Notification Indicator IE
ER	-		Endpoint Reference IE

Detailed Comments : Invalid NOTIFY (message length error) sent to IUT

RC_r1v

Constraint Name : RC_r1v(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_COM
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1r(MT_RC)		
ML	ML_V1(6)		
CA_OCC1	CA_V1r(?,CAUSE)		Cause IE (1st)

Detailed Comments : Valid RELEASE COMPLETE sent to IUT

RC_s4icr3

Constraint Name : RC_s4icr3(FLAG,CALL_REF:BITSTRING)
PDU Type : REL_COM
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_N2(FLAG,CALL_REF)		Invalid CR.length not equal to 3
MT	MT_V1(MT_RC)		
ML	ML_V1(0)		
CA_OCC1	-		Cause IE (1st)
CA_OCC2	-		Cause IE (2nd)
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invalid RELEASE COMPLETE (CR length not equal to 3) sent to IUT

RC_s4v

Constraint Name : RC_s4v(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_COM
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RC)		
ML	ML_V1(6)		
CA_OCC1	CA_V3('0000'B,CAUSE)		CA IE
CA_OCC2	-		Cause IE (2nd)
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE COMPLETE sent to IUT with CA IE used with CA_23 (coding=11)

RC_s4vcagit

Constraint Name : RC_s4vcagit(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_COM
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RC)		
ML	ML_V1(6)		
CA_OCC1	CA_V1('0000'B,CAUSE)		CA IE
CA_OCC2	-		Cause IE (2nd)
GIT_OCC1	GIT_V1		GIT IE
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE COMPLETE sent to IUT with CA IE

RC_s5icao

Constraint Name : RC_s5icao(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_COM
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RC)		
ML	ML_V1(6)		
CA_OCC1	CA_V1('1111'B,CAUSE)		Cause IE (1st)
CA_OCC2	-		Cause IE (2nd)
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invaalid RELEASE COMPLETE (CA location=1111B) sent to IUT

RC_s6icap

Constraint Name : RC_s6icap(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_COM
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RC)		
ML	ML_V1(6)		
CA_OCC1	CA_N2('0000'B,CAUSE)		Cause IE (1st)
CA_OCC2	-		Cause IE (2nd)
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE COMPLETE (CA spare=111B) sent to IUT

RC_s7il

Constraint Name : RC_s7il(FLAG,CALL_REF:BITSTRING)
PDU Type : REL_COM
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RC)		
ML	ML_V1(10)		invalid ML. Message length error
CA_OCC1	-		Cause IE (1st)
CA_OCC2	-		Cause IE (2nd)
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invalid RELEASE COMPLETE (message length error) sent to IUT

RC_s8idup

Constraint Name : RC_s8idup(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_COM_REP
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RC)		
ML	ML_V1(6 +6 +6)		
CA_OCC1	CA_V1('0000'B,CAUSE)		CA IE
CA_OCC2	CA_V1('0000'B,CAUSE)		CA IE
CA_OCC3	CA_V1('0000'B,CAUSE)		invalid duplicated
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)
GIT_OCC4	-		Generic Identifier Transport IE (4th)

Detailed Comments : Invalid RELEASE COMPLETE (3 CA) sent to IUT

RK_r1vall

Constraint Name : RK_r1vall(FLAG,CALL_REF:BITSTRING)
PDU Type : REST_ACK
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1r(MT_RK)		
ML	ML_V1(5)		
CI	-		
RI	RI_V1r('010'B)		RI IE

Detailed Comments : Valid RESTART ACKNOWLEDGE received from IUT

RK_r2vci

Constraint Name : RK_r2vci(FLAG,CALL_REF:BITSTRING;VP,VC:INTEGER)
PDU Type : REST_ACK
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1r(MT_RK)		
ML	ML_V1(14)		
CI	CI_V2r(VP,VC)		CI IE
RI	RI_V1r('000'B)		RI IE

Detailed Comments : Valid RESTART ACKNOWLEDGE received from IUT

RK_s1ipdisc

Constraint Name : RK_s1ipdisc(FLAG,CALL_REF:BITSTRING)
PDU Type : REST_ACK
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	IPD_ID		Invalid PD
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RK)		
ML	ML_V1(5)		
CI	-		
RI	RI_V1('010'B)		RI IE

Detailed Comments : Invalid RESTART ACKNOWLEDGE (Protocol Discriminator error) sent to IUT

RK_s2ishort

Constraint Name : RK_s2ishort(FLAG,CALL_REF:BITSTRING)
PDU Type : REST_ACK
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RK)		
ML	-		
CI	-		
RI	-		

Detailed Comments : Invalid RESTART ACKNOWLEDGE (too short) sent to IUT

RK_s3icr58

Constraint Name : RK_s3icr58(FLAG,CALL_REF:BITSTRING)
PDU Type : REST_ACK
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_N1(FLAG,CALL_REF)		Invalid CR.non-zero bits 5-8 octet 1
MT	MT_V1(MT_RK)		
ML	ML_V1(5)		
CI	-		
RI	RI_V1('010'B)		RI IE

Detailed Comments : Invalid RESTART ACKNOWLEDGE (CR non-zero bits 5-8 octet 1) sent to IUT

RK_s4icr3

Constraint Name : RK_s4icr3(FLAG,CALL_REF:BITSTRING)
PDU Type : REST_ACK
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_N2(FLAG,CALL_REF)		Invalid CR.length not equal to 3
MT	MT_V1(MT_RK)		
ML	ML_V1(5)		
CI	-		
RI	RI_V1('010'B)		RI IE

Detailed Comments : Invalid RESTART ACKNOWLEDGE (CR length not equal to 3) sent to IUT

RK_s1vall

Constraint Name : RK_s1vall(FLAG,CALL_REF:BITSTRING)
PDU Type : REST_ACK
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RK)		
ML	ML_V1(5)		
CI	-		
RI	RI_V1('010'B)		RI IE

Detailed Comments : Valid RESTART ACKNOWLEDGE sent to IUT

RL_r1v

Constraint Name : RL_r1v(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1r(MT_RL)		
ML	ML_V1(6)		
CA_OCC1	CA_V1r(?,CAUSE)		CA IE
CA_OCC2	-		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE received from IUT

RL_r100

Constraint Name : RL_r100
PDU Type : REL_REP
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1r(?)		
MT	MT_V1r(MT_RL)		
ML	?		
CA_OCC1	?		Cause IE
CA_OCC2	*		Cause IE
CA_OCC3	-		Cause IE
NI_OCC1	-		Notification Indicator IE (1st)
NI_OCC2	-		Notification Indicator IE (2nd)
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)
GIT_OCC4	-		Generic Identifier Transport IE (4th)

Detailed Comments : Valid RELEASE received from IUT

RL_r2vdiag

Constraint Name : RL_r2vdiag(FLAG,CALL_REF,CAUSE:BITSTRING;DIAG:HEXSTRING;DIAG_LEN:INTEGER)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1r(MT_RL)		
ML	ML_V1(6 + DIAG_LEN)		
CA_OCC1	CA_V2r(?,CAUSE,DIAG,DIAG_LEN)		CA IE (diagnostics)
CA_OCC2	-		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE received from IUT with CA IE (diagnostics)

RL_r3v

Constraint Name	: RL_r3v(FLAG,CALL_REF,CAUSE1,CAUSE2:BITSTRING;DIAG:HEXSTRING;DIAG_LEN:INTEGER)
PDU Type	: REL
Derivation Path	:
Encoding Rule Name	:
Encoding Variation	:
Comments	:

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1r(MT_RL)		
ML	ML_V1(6 + 6 + DIAG_LEN)		
CA_OCC1	CA_V1r(?,CAUSE1)		CA IE
CA_OCC2	CA_V2r(?,CAUSE2,DIAG,DIAG_LEN)		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE received from IUT with 2 causes 1st without diag 2nd with

RL_r4v

Constraint Name : RL_r4v(FLAG,CALL_REF,CAUSE1:BITSTRING;DIAG:HEXSTRING;DIAG_LEN:INTEGER;CAUSE2:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1r(MT_RL)		
ML	ML_V1(6 + DIAG_LEN + 6)		
CA_OCC1	CA_V2r(?,CAUSE1,DIAG,DIAG_LEN)		CA IE
CA_OCC2	CA_V1r(?,CAUSE2)		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE received from IUT with 2 causes 1st with diag 2nd without

RL_s1ipdisc

Constraint Name : RL_s1ipdisc(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	IPD_ID		Invalid PD
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(6)		
CA_OCC1	CA_V1('0000'B,CAUSE)		Cause IE
CA_OCC2	-		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invalid RELEASE (Protocol Discriminator error) sent to IUT

RL_s1v

Constraint Name : RL_s1v(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(6)		
CA_OCC1	CA_V1('0000'B,CAUSE)		Cause IE
CA_OCC2	-		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE sent to IUT

RL_s12idupnigit

Constraint Name : RL_s12idupnigit(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_REP
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(6 + 5 + 5 + 5 + 5 + 5 + 5)		
CA_OCC1	CA_V1('0000'B,CAUSE)		Cause IE
CA_OCC2	-		Cause IE
CA_OCC3	-		Cause IE
NI_OCC1	NI_V1		Notification Indicator IE (1st)
NI_OCC2	NI_V1		Notification Indicator IE (2nd)
GIT_OCC1	GIT_V1		Generic Identifier Transport IE (1st)
GIT_OCC2	GIT_V1		Generic Identifier Transport IE (2nd)
GIT_OCC3	GIT_V1		Generic Identifier Transport IE (3th)
GIT_OCC4	GIT_V1		Generic Identifier Transport IE (4th)

Detailed Comments : Invalid RELEASE (with NI 2 times and GIT 4 times) sent to IUT

RL_s13icalh101

Constraint Name : RL_s13icalh101(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(35)		
CA_OCC1	CA_N3('0000'B,CAUSE)		Cause IE, Invalid CA. length =35
CA_OCC2	-		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invalid RELEASE (CA length=35, IE header/flag=1, indicator=101B) sent to IUT

RL_s2ishort

Constraint Name : RL_s2ishort(FLAG,CALL_REF:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	-		
CA_OCC1	-		Cause IE
CA_OCC2	-		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invalid RELEASE (too short) sent to IUT

RL_s2vni

Constraint Name : RL_s2vni(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(6)		
CA_OCC1	CA_V1('0000'B,CAUSE)		Cause IE
CA_OCC2	-		Cause IE
NI	NI_V1		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Valid RELEASE sent to IUT

RL_s20iun

Constraint Name : RL_s20iun(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_UN
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(6 + 5)		
CA	CA_V1('0000'B,CAUSE)		CA IE
UN	UN_V1		Unrecognized IE
RI	-		

Detailed Comments : Invalid RELEASE sent to IUT with unrecognized IE

RL_s20inil

Constraint Name : RL_s20inil(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(6 + 23)		
CA_OCC1	CA_V1('0000'B,CAUSE)		Cause IE
CA_OCC2	-		Cause IE
NI	NI_N1		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invalid RELEASE sent to IUT with the length of NI exceeding the maximum length.

RL_s20inic

Constraint Name : RL_s20inic(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(6 + 5)		
CA_OCC1	CA_V1('0000'B,CAUSE)		Cause IE
CA_OCC2	-		Cause IE
NI	NI_N2		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invalid RELEASE sent to IUT with NI/Coding standard = '10'B.

RL_s21iri

Constraint Name : RL_s21iri(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL_UN
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)		
ML	ML_V1(6 + 5)		
CA	CA_V1('0000'B,CAUSE)		CA IE
UN	-		
RI	RI_V1('010'B)		unexpected recognized IE

Detailed Comments : Invalid RELEASE sent to IUT with unexpectd recognized RI IE

RL_s3icr58

Constraint Name : RL_s3icr58(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_N1(FLAG,CALL_REF)		Invalid CR. non-zero bits 5-8 octet 1
MT	MT_V1(MT_RL)		
ML	ML_V1(6)		
CA_OCC1	CA_V1('0000'B,CAUSE)		Cause IE
CA_OCC2	-		Cause IE
NI	-		Notification Indicator IE
GIT_OCC1	-		Generic Identifier Transport IE (1st)
GIT_OCC2	-		Generic Identifier Transport IE (2nd)
GIT_OCC3	-		Generic Identifier Transport IE (3th)

Detailed Comments : Invalid RELEASE (CR non-zero bits 5-8 octet 1) sent to IUT

RL_s3vgit

Constraint Name : RL_s3vgit(FLAG,CALL_REF,CAUSE:BITSTRING)
PDU Type : REL
Derivation Path :
Encoding Rule Name :
Encoding Variation :
Comments :

Field Name	Field Value	Field Encoding	Comments
PD	PD_ID		
CR	CR_V1(FLAG,CALL_REF)		
MT	MT_V1(MT_RL)
