

Maskless Capeless Free

4KB Executable Graphics by

Church of the Spinning Cube

Presented at

Hogmanay Party 2020

Coded by

Alia

What is it

A strange mix of art and code. A 4KB executable for macOS that draws a picture. There are no 3d models or textures, just 4KB of code.

This is a sequel of sorts to 'Kept in a box', released at the same party.

How to run it

Run one of the executables from Terminal on macOS and wait for 30 seconds. It should run on 10.15 or later.

Please note that this needs a powerful GPU - try the 1080p version if you have a high end graphics card, otherwise try 540 or 720.

What's it about

This is a sequel to my last piece, 'Kept in a box'. That was about people who, despite knowing who they truly are and how they want to live their lives, choose to remain in the closet to protect others (usually their family) even though the cost to themselves is great.

This, truly, is heroic - and it's a kind of heroism few people ever see. It remains hidden, kept in a box.

But sometimes they find a way out. They drop their disguise, take the key, walk out into the sunshine. And find freedom.

'Kept in a box' showed the cell, this shows the open door, the hero's disguise of mask and cape discarded.

Greetings

Crobisaur, Enpera, Ephemeralman, Polarity, Poobrain, Prismbeings, Rift, Slipstream, Suricrasia online, Sylvia & Charlotte, The Moonbase, 5711. All of the torii. And the people I forgot. There's sure to be many :)

Warranty

None given, use at your own risk. It'll probably be fine, but save your work before running it!
